

Register

Easy Applet Builder is a shareware. The unregistered version is for trial use only and the applets created with an unregistered version can work off line on your local hard drive and open a pop up window on line.

Why registering ?

One reason to register is to stop the pop up on line. Another reason is that it gives me a little money to let me make Easy Applet Builder better and more powerful (by adding new applets for instance).

Registering gives you free email support (english support only).

When you register you get a code which you put in the register window, then Easy Applet Builder writes correctly the “registration_code” parameter for all the applets.

Note that your registration is valid for all domain names.

Moreover the Easy Applet Builder registration code will remain the same for all next versions ! That is to say **you will be able to get all new versions, including new applets, for free !**

To do that, get on line at <http://www.taijisoftware.com> the last shareware version and unlock it with your serial number.

How to enter registration information ?

Click on the register button in the nag window on start or click the register menu item (Tools>Register) and simply enter the registration code. Easy Applet builder will be restarted.

How to register ?

(Prices at the 10/21/2001)

☐ **Online (Credit card, Check, Fax, Phone) : Price is \$24.95.**

- Go to <http://www.taijisoftware.com>
