

## **Instant Drive Access v1.30 for Windows 95/NT 4.0**

Thank you for trying Instant Drive Access v1.30.

**NOTE:** You use this program at your own risk. This program is provided as freeware, which means you may use this program freely for as long as you wish. The author would like to know where this program ends up, so if you have access to the Internet please mail him your comments at: [jel@post1.tele.dk](mailto:jel@post1.tele.dk).

### **What is Instant Drive Access:**

Instant Drive Access is a little utility which gives you access to all your drives by the click of an icon in the traybar.

### **Features:**

- Show free space for your drive(s).
- Show summarized free space for all your drives.
- Add your own favorite programs to the Instant Drive Access-menu or in submenus.
- Add shortcuts (aliases) to your favorite directories to the Instant Drive Access-menu.
- Open your drive(s) with your favorite filemanager.
- Tile or cascade the open windows on your desktop.
- Context-sensitive help.
- Find file/directory function.
  - Flexible menus.

### **Whats new in this version (v1.30):**

- Added find file/directory function (no wildcards search though).
- Added more flexibility to the menusystem.
- Added initial window size (normal, maximized, minimized) for programs.
  - General bug-fixes.

### **How to setup Instant Drive Access:**

1. Copy the file IDA.EXE to a folder of your choice.
2. Make a shortcut in your startup folder to IDA.EXE.
3. Restart Windows.

You now have the Instant Drive Access icon in your icontray. Double-clicking the icon will bring up the configuration dialog. Right-clicking the icon will show you the drive-menu.

Look in the Instant Drive Access helpfile (IDA.HLP) for further informatino about configuring Instant Drive Access.

### **How to put programs in sub-menus:**

1. Open the menu-tab on the options-screen of Instant Drive Access.
2. Click the 'Add item' button
3. Select the file you wish to add to the menu.
4. Click 'Create in', if you wish to add the item to a submenu.
5. Select the submenu, in which you wish to add the item (if the menu doesn't exist then press the 'new submenu' button and enter the name of the menu.
6. Make sure the sub-menu item is selected before pressing the OK button.
7. Enter the program-caption press 'OK'.

#### **How to un-install Instant Drive Access:**

1. Press the Uninstall button on the options screen.
2. Remove the shortcut from the startup-folder.
3. Delete the file IDA.EXE.
4. Restart Windows.
