GoScript can print with special effects...

The logo features the word "GoScript" in a cursive script font at the top. Below it, the word "GoScript" is repeated in a bold, outlined, sans-serif font. At the bottom, there is a large, solid black letter "A" on the left, and a large, stylized, outlined letter "G" on the right that overlaps with the "A".

GoScript products allow you to enjoy:

- Fonts! Scalable from 4 to 1000+ points
- The untapped power of your application's PostScript language features and benefits (PageMaker, Word, WP, VP, Windows, etc.)
- PostScript language printing on most popular laser, ink jet and dot matrix printers
- Time and money savings by proofing your PostScript documents before typesetting
- Conversion of PS files to PCX and TIFF
- True WYSIWYG screen preview for EGA and VGA monitors
- Interactive mode for direct communication with the interpreter
