

DOWN: Soft Font Downloader for Microsoft WORD  
version 1.0

DOWN is a replacement for the Microsoft Word downloading program. As it downloads a soft font to the HP Laserjet, it displays a description of each font and the file title of the soft font. This helps a great deal when you can't figure out why the laser printer doesn't seem to be using the right fonts.

For example, if you use Word to format a paragraph with Helv 12 bold-italic and you only have Helv 12 bold and Helv 12 italic, Word won't pick either one. The laser printer will pick something "close" based on its own rules. By watching the DOWN messages you'll see which fonts are actually getting downloaded.

DOWN will also display an error message and stop if it can't find a match or can't find the soft font file. You can then hit Enter to let it continue. This way you'll at least know what the problem is.

To install DOWN, simply copy it to your Microsoft Word directory (replacing the Microsoft DOWN program).

This program is shareware by Gary Pardun Consulting. Try it, share it, upload it, download it. If you find it useful to you, register your copy by sending a check for \$15 to:

Gary Pardun Consulting  
2389 Sagamore Hills Drive  
Decatur, GA 30033-1216

Be sure to include your name, address, phone number, and the name and version of the software.

Benefits of registration: software upgrades for price of floppy and postage, notice of additional software availability, and ice cream for my kids.

If you have any difficulty with the program, or suggestions for improvement, mail your comments to the above address or call (404)634-6800.
