Visual Basic Custom Radiobutton / Checkbox Controls
(c)1992 by Mark Gamber

These controls provide a 3-D checkbox and radiobutton to Visual Basic. To begin using the controls, copy **VBCHKBOX.VBX** and **VBRDOBTN.VBX** to your Visual Basic directory. Select "Add File..." from the "File" menu and select the files from the listbox displayed. You should see a new icon in the toolbar for each control selected.

Properties:
  CheckColor: Specifies an RGB value to use for the "check" color.

  ChkBrdColor: Specifies an RGB value to use for the "check" border color.

  TextShadow: TRUE enables caption shadows, FALSE disables the shadow.

  TextShadowCol: Specifies and RGB value for the text shadow color.

  Version: Specifies the version of this control. 100 is version 1.00, for example.

Events:
  Click: Called when the control is clicked on.

About this program:
  This control is public domain and is free for all to use and distribute. In using this control, the author and software is released from responsibility for any damages caused, whether real or imagined. This software is not officially supported, but questions and comments are always welcome, via E-Mail to:
