

VB Source Code Tool Box

ALARM	Edit Alarm event database. (DB)
BADICONS	Test the icons in a directory.
BATDBUP	Shells a DOS DIR command and loading an Access database with the results. (DB)
BITMAP	Load a BitMap or Icon into an Access Database. (DB)
BOILERS	Control array usage example.
BUGGER	DDE Debugger example.
CALENDAR	Pop Up Calendar Form.
CASE	Lower, Upper and Name Case examples.
CODELIBR	Source Code Librarian for your favorite routines. (DB)
COMDLG01	Common dialog usage examples.
COMFILE	Combine Tool Box Files
COMPACT	Compact any Access database. (DB)
COMPILE	Mass VB Project Recompiler.
CONVERT1	Convert DBase File to Access Database. (DB)
COPYRITE	Scan Files for Copyright
DBCOUNT	Get Database Record Counts. (DB)
DBDATEP1	Using dates from an Access database. (DB)
DBDELETE	Delete records from any Access Table. (DB)
DBFMDESN	Designs Data Control forms for any Access Table. (DB)
DBGRID	Load a Grid from a Database or Data Control. (DB)
DBICON	Load Icons into an Access Database. (DB)
DBOUT	Load the Outline Control from an Access Database. (DB)
DBPRINT	Prints the fields and indexes from any Access Database. (DB)
DBPRINTD	Prints the fields and indexes from any DBase File. (DB)
DBSTATES	Load the States and their abbreviations from an Access database. (DB)
DBVIEW1	View Database Collections. (DB)
DBVIEW2	View Database Collections. (DB)
DC1	Simple Data Control Maintenance example. (DB)
DC2	Complex (6) Data Control Maintenance example. (DB)
DCBITMAP	Loads Bitmaps and Icons into a Data Control. (DB)
DCPHONE	Phone Database. (DB)
DDETESTR	Test DDE.
DRAGOUT1	Enhanced Drag and Drop method.
DROPFIL	Drag and Drop files from File Manager demo.
DUPTABLE	Duplicates any Access Table. (DB)
DYNAGRID	Dynamically view any Access table in a Grid control. (DB)
DYNASQL	Dynamically execute SQL statements against any Access Database. (DB)
EXEPATH	Application path API examples.
FILELIST	Update last file used file list.
FLASH12	How to flash a screen during long running activities.
FLOOD1	How to use a Panel control as a status meter.
GRAFGRI	Editable Grid and graphing grid contents with the Graph control.
GRID4	Load a grid control from a Data Control. (DB)
ICONMIN	Animate minimized icons.
ICONVIEW	View all Icons in a subdirectory.
INVEN1	Dynamically create an Access database, table and index from VB code. (DB)
LDEMO	Comprehensive demo of Graph Control and Crystal Reports with an Access database. (DB)

VB Source Code Tool Box

LDSAMPHS	Load the samples database . (DB)
LDSTATES	Load the States database from a text file. (DB)
LISTBOX1	List Box with Tabs and Horizontal scroll bar. API example.
LISTBOX2	Friendly List Box
LISTBOX4	List Box loaded from a Data Control. (DB)
LISTBOX5	Transfer items between List Boxes.
LOTTO	Lotto random number generator.
MAKELOAD	Load Make Database. (DB)
MSGBOXMK	Message Box code generator.
ORDERHLD	Load Demo Database. (DB)
OUTDEMO1	Outline Control Methods, Properties and Events.
PARAMETR	Parameter Query example. (DB)
PASSWORD	How to Implement Passwords in an Access database. (DB)
POPMENU	Pop Up Menu Code generator.
PRINTPRO	Prints VB Source Code in a formatted form.
PROFILE	Demo API's for INI file access.
SCRNSAVE	Demo Screen Saver.
SEEKER	Scans source code for literals.
SELECT	How to do a VCR like List Box.
SLIDE	BitMap slide show.
SPEEDDB1	Access database speed examples. (DB)
SPLIT	How to use drag and drop to resize controls.
SQLTEST	Simple SQL statement examples. (DB)
STATES	Load state abbreviations and names from a text file.
STATUS	Dynamically update a Status message as a user navigates your application.
TESTCAL	Test the Pop up calendar.
TESTPATH	Test for a paths and file existence.
TIMESET	Set the windows time. Demonstrates usage of the Spin control.
UNPACKVB	Unpack Combined Files.
UPPROJEC	Update the project database. (DB)
VBPHONE	Access a DBase Phone database using the Data control. (DB)
WAKEUP	Alarm wakeup program. Place this program in your startup group.
