

Thank you for taking the time to evaluate Time and Billing for Windows.

Time and Billing for Windows requires a copy of the VBRUN100.DLL. VBRUN100.DLL can be found on most popular PC access bulletin boards usually under the name VBRUN.ZIP.

After starting Time and Billing for Windows for the first time you will be asked to complete a Company Information Screen, this step is important as this information is used when you print invoices.

Next you should run Client Setup, Task Setup and TimeKeeper Setup to configure your system.

If you have problems or questions or find any "bugs" please contact us at:
