Crystal Reports Technical Document

Subject: Not seeing all/any records on a browse field data (timing out)
Date: July 27, 1993
Versions: 2.0+

Description:
The browse field data will show the first 100 distinct values for a field up to a timeout value. The default value is 5 Seconds. This will be greater for a SQL table (may return the fist value after a brows period of greater than 5 seconds).

To change these options add these options to the CRW.INI.

BrowseTimeout=60
MaxNBrowseValues=10

This will timeout after 60 seconds or after having selected ten field values.

Remarks:
None
