

Crystal Reports Technical Document

Subject: Manual Installation Procedure for CRW

Date: August 6, 1993

Versions: all

Situation:

Problem with the install program. System hangs.

Solution:

1. Create a directory for Crystal Reports; \CRW
2. Copy all files from all the Crystal Reports disks into the \CRW directory
3. For all .CPS files, run this command from the \CRW> prompt;
compress -d <filename.CPS>
replacing <filename.CPS> with the actual name of each file.
4. Go into Windows and create a Crystal Reports Group and a Crystal reports Program Item that calls \CRW\CRW.exe
