Crystal Reports Technical Document

Subject: Upgrading 2.0 TO Crystal Reports for VB
Date: July 30, 93
Versions: Crystal Reports 2.0

Description:
When upgrading from Crystal Reports 2.0 to Crystal Reports for Visual Basic the following steps should be followed...

- Install Crystal Reports 2.0.
- **Move** the all the DLLs from the Crystal Reports 2.0 directory to the WINDOWS\SYSTEM\ directory.
- Install Crystal Reports for Visual Basic. (This will overwrite older DLLs with the newer ones and make locatable missing DLLs).
- Remove the Crystal Reports 2.0 subdirectory.

Remarks:
The data access method for Crystal Reports for Visual Basic is via the Microsoft Access Engine. Once the upgrade is completed access to .MDB database is available.

When distributing files use the appropriate files for the access method.
