Crystal Reports Technical Document

Subject: SQL Server / Sybase ODBC
Date: July 29, 1993
Versions: CRW for VB ,2.0 Professional

Situation:
Must have a datasource name for access the SQL Server.
The name of the server must be the address for that data source section
eg.
Server=Myserver
Address=\\Myserver\PIPE\SQL\QUERY

If the default install address is used; \PIPE\SQL\QUERY, the address line is not needed. The Address line is used if not a default install.
eg.
Server=Myserver

Remarks:
Ensure that DBNMPIPE.EXE IS NOT installed. This is the DOS Named pipe layer.
        (Characterized by a communication error of some sort.)

Ensure that DBNMP3.DLL IS installed. This is the Windows Named pipe layer.

Ensure PDSODBC.DLL, ODBC.DLL and ODBCINST.DLL are located in the \WINDOWS\SYSTEM directory for VB version and in the CRW directory for the 2.0 Pro version.
Make sure all of the above have a 2.01am time stamp for the professional version and 12.00am time stamp for the Crystal Reports for Visual Basic.

CRPE.DLL	**CRW.EXE**
Pro 2.01am	Pro 2.01am
VB 12.00am	VB 12.00am

PDSODBC.DLL
Pro 2.01am
VB 12.00am

ODBC.INI	**ODBC.DLL**	**ODBCINST.DLL**
	Pro 2.01am	Pro 2.01am
	VB 12.00am	VB 12.00am

SQLSRVR.DLL
Pro 2.01am
VB 12.00am

DBNMP3.DLL
2.01am
