**Crystal Reports Technical Document**

**Subject:**      Not seeing all/any records on a browse field data (timing out)
**Date:**         July 27, 1993
**Versions:**    2.0+

**Description**:
The browse field data will show the first 100 distinct values for a field up to a timeout value. The default value is 5 Seconds. This will be greater for a SQL table (may return the first value after a browse period of greater than 5 seconds).

To change these options add these options to the CRW.INI.

BrowseTimeout=60
MaxNBrowseValues=10

This will timeout after 60 seconds or after having selected ten field values.

**Remarks:**
None
