Welcome to the Visual Cafe Online Demo

The demo lets you view commonly performed Visual Cafe tasks through step-by-step procedures and videos. It can help you become familiar with Visual Cafe features, including new features in version 3.0, very quickly.

You did not install the demo during Visual Cafe installation. To view the demo, you have two choices:

- On the Visual Cafe CD, go to the Demo directory and copy it to your hard disk. Place the directory in a Visual Cafe \Help\Demo directory. The demo is approximately 115 megabytes in size.

- Double-click the Demo.hlp file in the Demo directory of the CD to run the demo. The display of windows and AVI files will be slower than if you run the demo from your hard disk.
