This Help Library gives you unified access to InstallShield online help. This library's Help Topics dialog—the Contents, Index, and Find tabs—incorporates all the help files available with InstallShield.

For more focused help access, you can open any InstallShield help file individually—either from InstallShield's Help menu or from the links below. Once you are in an individual help file, you can open any other help file or this Help Library from the file's Help menu.

For the latest versions of InstallShield help files, visit our documentation Web page.

For answers to many commonly asked questions and new information about InstallShield that may not appear in the documentation, visit the InstallShield Knowledge Base.

Since the body of this Help Library is a single page with links to other help files, the menus above are not likely to be much use to you.

To get the most out of InstallShield online help, we recommend that you maximize the search capabilities of the Find tab by doing the following:

1.   Click here .

2.   If you have already built the Find tab with minimum database size (the default option), click the Rebuild... button in the Find tab.
3.   In the Find Setup Wizard, click the "Maximize search capabilities" radio button; click Next; then click Finish.

Getting Started
    n   Advice, guidelines, and tutorials for beginning to use InstallShield.

    n   Information for users of InstallShield3.

Getting Results
    n   Overviews and step-by-step procedures for all aspects of creating an InstallShield setup.

    n   A reference guide to every portion of the InstallShield IDE.

Language Reference
          A guide to the structure, elements, syntax, and functions of the InstallScript language.
