

ctDATA (Data Navigation Button VBX) ctDATE (Calendar VBX) from the Component Toolbox (Standard Edition)

The ctDATE and ctDATA VBX controls are from the Component Toolbox series. They are being made available in this manner by popular demand. The product can be registered via SWREG # 4116 for \$30.00. It should be noted that a registered version **only** includes the ctDATA and ctCTDATE VBX controls. They do not include run-time versions of any other VBX controls that may appear in the demo. All deliveries will be made via Compuserve E-Mail. It will include the VBX controls, licence files, and documentation in .WRI format. If you would like to view the other controls in the Component Toolbox, download "CTDEMO.ZIP" from the third party vendor library. Component Toolbox currently contains 24 different VBX controls and can be registered via SWREG # 3852.

NOTE :

All single controls ordered in this manner are ordered as is. Because these controls are only a subset of the entire package, you will not be eligible for any upgrades to the control (unless there are obvious bugs within the control). The controls are delivered as is at the time of purchase. To be eligible for upgrades, the entire Component Toolbox package must be ordered. Nor will purchases of single controls necessarily be eligible for a discount on the entire Component Toolbox (unless Gamesman Inc becomes involved with a special promotion). Once again, these controls are being made available seperatly only due to popular demand.
