
Preface 1

SCO ODT MMDF SLS

Release and Installation notes 3

Distribution Contents	3
Documentation	3
Installation media	3
Known problems and limitations	4
Installation notes	4
Diskspace requirements	4
Installing the MMDF SLS	4
Executing the cvttai script	6
Removing the SLS	6

Chapter 2

Setting up electronic mail 9

Chapter overview	10
How MMDF works	10
Outgoing mail	11
Incoming mail	14
The configuration utility	15
Configuring communications channels	16
Configuration utility limitations	16
MMDF configuration checklist	17
Host name	19
Domain name	19
Fully-qualified host name	20
Hide your host name?	22
Redirect mail for root?	22
Redirect mail for mmdf?	23
Postmaster address	23
Setting up MMDF for UUCP	23
Configuring MMDF to use a name server	24
Configuring smart hosts	24

Running the configuration utility	25
Running the configuration utility with TCP/IP installed	33
Preparing MMDF for use	35
Other common configuration tasks	37
Rebuilding the MMDF hashed database	37
MMDF configuration files	38
The mmdftailor file	39
Alias files	47
Domain files	50
Channel files	54
How MMDF routes mail	56
Searching MMDF domain tables	56
Delivery channel programs	58
Modifying MMDF configuration	60
Guidelines for manual configuration	60
Changing the postmaster alias	60
Maintaining user aliases	61
Changing the host name	61
Hiding your host name	62
Changing your smart host	63
Changing error logging levels	63
Converting from XENIX	63
Modifying UUCP host configuration	66
Adding or removing an SMTP host	67
Running multiple deliver daemons	68
Rebuilding the MMDF hashed database	69
Testing MMDF configuration	70
Checking for MMDF problems	70
Testing mail addresses	70
Maintaining the MMDF system	71
Checking the status of mail queues	71
Removing old mail from the queues	72
Monitoring the size of log files	72
Advanced MMDF configuration tasks	72
Changing the location of system mailboxes	72
Specifying the MMDF "signature"	73
Configuring MMDF authorization	73
Adding a new alias file	82
Adding a new domain file	84
Adding a third-party channel program	85
Changing MMDF parameters	85

Getting more information	87
checkaddr(ADM)	90
checkque(ADM)	91
