## An Open File Manager

The open file manager allows you to monitor which files are open at any given time, and to close any from the displayed list - very handy for checking for open !Run files, etc.

## ADDITIONAL ITEMS DESCRIBED IN

Put your own disc-based applications into the RISC OS 3 Resources directory with this

Backdrop

170%

Resource Generator. As an example, a module called German Risc is included which provides German language messages for many of the ROM-based applications.

## Pinboard Backdrops

New Resources

using this clever application, or add to its repertoire with your own designs of sprites for tiling.

## BONUS ITEMS

This well presented game enables you to play the computer at Poker Dice by taking turns in throwing the dice to see who can achieve the

Poker

parent which

er and

effi - takes mean - mber.

Just drag your Basic program to the application and all the work is done for you.

## Path Tools

This application enables separate paths in Draw objects to form a single path with move segments, with numerous options to be selected by the user. It will also perform the reverse of this

process, and can be used to create masks, thus providing many of the functions to be found in Vector.

## Keystrip Editor

Following last month's keystrip for RISC OS 3 Draw, we now present a complete keystrip editor, for creating, editing and printing any keystrips

Path tools

170%

you need for your Archimedes.

## Basic Differences

This is another application which should prove very useful to Basic programmers. It can be used to compare two versions of a Basic program to highlight their differences, and can also be used to merge the two versions together under user con-

Keystrip

trol. It also provides an easy way for published updates to be appended/merged with existing programs.
