
h Rotating HyperCubes

This program attempts to give you an impression of the fourth dimension by allowing a projection of a hypercube to be rotated on screen.

Equipped with red/green glasses, or good control over your eyes, you will be able to see a truly remarkable three-dimensional animation in which the projection moves, turns and distorts as the hypercube rotates. More information on this program, and how to get by without red/green glasses, can be found in the article

Exploring Hyperspace in the magazine.

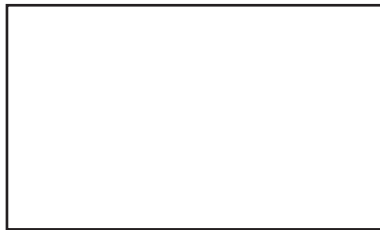

h Text Kerner

Kerning is a powerful typographical technique for moving characters closer together, thus

enhancing both the design of the page and the readability of the text. This little application, for RISC OS 3 only, demonstrates the use of the kerning tables built into many RISC OS 3 fonts. It is the perfect complement for Draw, which can display kerned text but provides no facility for actually performing the kerning. Kerning is described in the All About Outline

h Window Writer

This application, illustrating the Wimp Topics feature in this month's magazine, demonstrates the types of routines used by many text editors and DTP applications for displaying large blocks of text in a window, scrolling text by a full line at a time, redrawing certain areas of text,

BONUS ITEMS

h Aces Patience

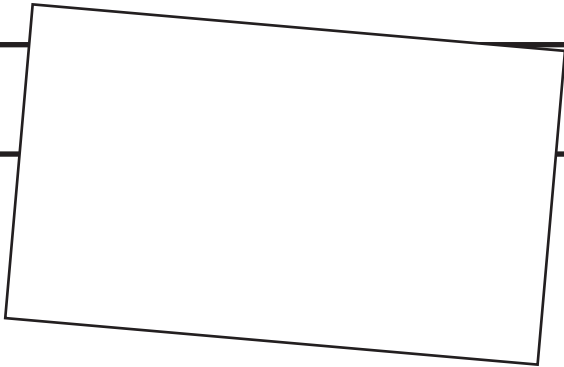

Aces is an addictive version of Patience that runs on the Desktop. It has attractive and colourful cards, as well as a full high score table. The aim of the game is to end up with the four aces exposed, one at the

bottom of each column.

h Astronomical Information

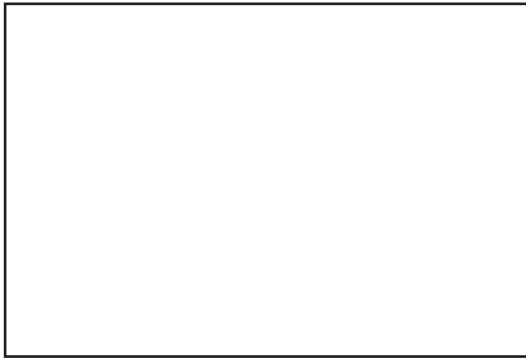

This application provides extensive astronomical information on the Sun, Moon and planets from any

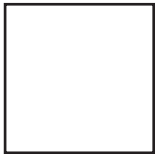

This action-packed magazine disc costs just £4.75 inc VAT.

RISC User and BEEBUG Vol.12 No.5.

h Draw File Merger

DrawMerge will prove an excellent addition to your CAD utilities directory. It is a very simple application that merges the contents of two Draw files into a single file, with all the objects in the new file retaining their original positions on the page.

h ArcScan Data

ArcScan Indexes for this month s

h Missing Caret Locator

CaretFind is an invaluable utility that sits on the icon bar and displays the position of the caret when you click on

its icon. It will work with any application that displays the caret, whether it be in a writable icon, text editor or DTP window, or CAD or art package that allows you to

h Desktop Calendar and Diary

enter text. It is an absolute must for all A4 users!

Calendar is a considerably enhanced version of the Desktop Diary application originally published in RISC User 2:9 and 2:10. Its most important new feature is

ADDITIONAL ITEMS DESCRIBED IN THE MAGAZINE

h Gobble - The Word Game

Gobble is a challenging word game that will tax your mental and verbal skills. The object is to try and create as many words as possible from a grid containing sixteen random letters. In a race against the computer,

you only have as much time to find words as it takes Gobble to scan through its entire dictionary and

h TableDraw - Table Generator

compile a list of all the possible words.

TableDraw is a useful utility for creating tables containing information from spreadsheets, databases or even plain text editors.

The tables are created in

Draw file format, with all the text in the font of your choice, and can be edited, modified, rotated, stretched
