

Wimp Programming for All

by Lee Calcraft and Alan Wrigley

We believe that Wimp Programming for All is the definitive book on this subject for all users of Acorn RISC computers.

This book provides programmers with a complete introduction to all the techniques involved in writing multi-tasking Wimp programs to run within the RISC OS desktop environment. No prior knowledge of the Wimp is assumed and the tutorial style of the book will enable all programmers to understand the concepts involved and to develop their skills in writing high quality programs within the desktop environment.

Contents

Wimp Programming for All derives from the highly popular series of articles originally published in volume 3 of RISC User magazine and written by Lee Calcraft. This has been extensively revised with substantial additional material, all brought up to date for RISC OS 3.

To support the book there is a disc containing all the programs (at different stages of

The book consists of ten main chapters and a number of appendices:

- w Chapter 1: Introducing the Wimp
