

Borland Database Tools Setup

Enter a directory path into which you want to install the Database Tools components.

The Install To fields contain the recommended default directory structure.

The following table lists the default directory structure:

Component	Path
Borland Database Engine	C:\BDE
SQL Links	C:\IDAPI
	If you have previously installed an application that uses the Borland Database Engine (BDE), the default path is the location of the BDE.
Database Desktop	C:\DBD

Previous Button

Click Previous to return to the Borland Database Tools screen.
