The image shows a table structure on a white background. The table is composed of three rows and one column. Each row is defined by two horizontal dashed lines, and the columns are defined by vertical dashed lines. The top row is separated from the middle row by a vertical dashed line on the right side. The middle row is separated from the bottom row by a vertical dashed line on the right side. The bottom row is separated from the rest of the table by a vertical dashed line on the right side. The table is empty, with no text or data inside the cells.

The image shows a large, empty rectangular area defined by dashed lines. A vertical dashed line runs down the right side of the page. Two horizontal dashed lines run across the page, one near the top and one near the bottom, intersecting the vertical line. This layout suggests a table with one column and two rows, but the content is missing.
