\s @REPEAT("-",@CELLPOINTER("width")-1){CALC}{HOME} {DOWN}
    @sum({UP}.{END}{UP})~

    This macro will add up a column of numbers and as a bonus
    place a line under the column of numbers that is one less than
    the width of the column.

    To use the macro place the cursor and the bottom of numbers you
    want to add and hold down the macro key (Alt on most
    computers) and press the "S" key.

    If you combined this with another spreadsheet you will have to
    name the cell to the right of the \s to \s. To do this place the
    cursor on the \s and press slash (/), Range (R), Name (N),
    Lables (L), Right (R), and Enter. This will name the cell to the
    right of \s to \s.
