About This Guide

Today, many software manufacturers and businesses are recognizing the tremendous value of Adobe™ Acrobat™ software. That is why they are rapidly developing products and services that support this innovative, platform-independent, software-independent electronic document technology.

The product and service information in this catalog was supplied by the vendors. Adobe Systems Incorporated has not qualified or reviewed any claims the vendors have made about their products or services and is not responsible for their accuracy. This catalog does not represent a complete listing of all Acrobat products and services available.

The information in this catalog is subject to change without notice.

In this guide, you will find products and services grouped in categories for all kinds of uses—from document management to consulting services to information access services. Of special interest in this Summer 1995 issue is a section on plug-ins and an expanded section on electronic publishing and CD-ROM services.

This electronic guide will help you explore all the products and services available to you that are compatible with Acrobat software!

Use the Acrobat navigation tools in the menu bar and pull-down menus to help you navigate through this guide's many pages. Or explore the "links" embedded in this guide by using the **red arrows** or red symbols "◻" to go directly to the items that might interest you or to simply turn the page.

Adobe™ Acrobat Capture™

Adobe Systems Incorporated
1585 Charleston Road, P.O. Box 7900
Mountain View, CA 94039-7900 USA

Adobe Systems Europe Limited
Adobe House, Mid New Cultins
Edinburgh EH11 4DU
Scotland, United Kingdom

Adobe Systems Co., Ltd.
Yebisu Garden Place Tower
4-20-3 Ebisu, Shibuya-ku
Tokyo 150 Japan

Adobe, the Adobe logo, the Acrobat logo and Acrobat Capture are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Windows is a registered trademark of Microsoft Corporation.

▶ Acrobat Capture software is a Windows®-based page recognition product that will automatically recognize the different components of a printed page—text in a variety of typefaces and layout, plus black & white or grayscale images (photographs, bar charts, etc.)—and produce an exact electronic representation of the page in the Adobe Portable Document Format (PDF).

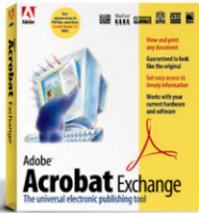

Acrobat Capture creates ready-to-use documents with complete page fidelity due to its robust page decomposition and “substitute bitmap words for suspects” capabilities. Acrobat Capture produces compact, intelligent, searchable files; supports standard file formats for both input and output; and works with the most popular business scanners.

Suggested retail price: \$2,995

Adobe Systems Co., Ltd.
Yebisu Garden Place Tower
4-20-3 Ebisu, Shibuya-ku
Tokyo 150 Japan

Adobe Acrobat software is quickly becoming the universal electronic publishing tool for a wide range of business users. And the Adobe Portable Document Format (PDF) is rapidly being adopted as the digital document standard for electronic publishing across a wide range of business uses.

This Acrobat CD Sampler shows you how Adobe Acrobat software lets you publish PDF files with *your* universe of authoring tools. Using your existing desktop applications, including word processing and desktop publishing programs, you can author dynamic, visually rich electronic documents in PDF.

Use Adobe Acrobat software to view and create PDF files universally. This CD-ROM includes Adobe Acrobat Reader software that runs on a range of platforms, including Macintosh®, Power Macintosh®, Windows® 3.1, Windows 95, Windows NT™, DOS and UNIX®.

(continued on next page)

Adobe Acrobat CD Sampler

Finally, PDF files can be shared universally across a broad spectrum of electronic distribution media. Use this CD-ROM to find out how you can publish electronic documents on the World Wide Web, or using Lotus Notes®, e-mail, enterprise networks, and CD-ROM. Simply put: publish once, distribute many times. And remember, PDF files can be printed on demand on virtually any printer.

Why not get started right now? See for yourself how Adobe Acrobat software can revolutionize the way you do business. Call 1-800-521-1976 to order the Adobe Acrobat CD Sampler.

Adobe, Acrobat and Fetch are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions.

Adobe Fetch software is the visual database, for individuals and workgroups, that catalogs all your digital media files. Organize your work in progress and completed work, including Adobe PDF files, publications, graphics, photos, presentations and more. Recognizing over 35 file formats, Fetch presents you with a gallery of thumbnails perfect for browsing or searching via keywords, filename, location and file type. Use Fetch to find, preview, play, print, place, copy or open items in an editing application. Whether you are a publishing professional, an artist, a designer or a multimedia producer using Adobe or other software, Fetch works with you from the beginning to the end of a project, helping you find all your finished work and all the pieces that went into it. And now, Fetch has an Adobe Acrobat™ filter, allowing Fetch to catalog Adobe PDF files, for an even more comprehensive file management solution. Electronic publishers: call the Adobe Developer Hotline for further information about the Adobe Fetch Content Publishers Toolkit to implement Fetch as a browser for your CD-ROM titles.

Adobe Illustrator™ 5.5

Adobe Systems Incorporated
1585 Charleston Road, P.O. Box 7900
Mountain View, CA 94039-7900 USA

Adobe Systems Europe Limited
Adobe House, Mid New Cultins
Edinburgh EH11 4DU
Scotland, United Kingdom

Adobe Systems Co., Ltd.
Yebisu Garden Place Tower
4-20-3 Ebisu, Shibuya-ku
Tokyo 150 Japan

Adobe, the Adobe logo, Adobe Illustrator and Adobe Photoshop are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh is a registered trademark of Apple Computer, Inc.

▶ Adobe Illustrator 5.5 software for Macintosh®, the industry's leading illustration and page design tool, features a new import/export capability that enables users to open and edit single pages of Portable Document Format (PDF) files. This capability, along with the program's editing tools, provides the fastest way to edit PDF files. Now you can change text characters, adjust curves, add color or gradients, and then export the edited page back to the original PDF file while maintaining links, bookmarks and annotations.

With Adobe Illustrator software, you can not only edit vector-based artwork, but also create new artwork for placement into PDF files. In addition, PDF files that contain photographs (raster or bitmapped images) are automatically tagged with an Adobe Photoshop™ program identification when imported into the Adobe Illustrator program. This allows you to launch Adobe Photoshop software from within the Adobe Illustrator program and to use all Adobe Photoshop tools to manipulate the image. You can then insert edited elements back into the original PDF file.

Corel VENTURA™ 5

Corel Corporation

1600 Carling Avenue
The Corel Building
Ottawa, Ontario
K1Z 8R7 Canada
1-800-772-6735
Fax: 1-613-761-9176

Adobe, Acrobat, Adobe Photoshop and Distiller are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Corel VENTURA and Corel PHOTO-PAINT are trademarks of Corel Corporation. Windows is a registered trademark of Microsoft Corporation.

▶

Corel VENTURA 5 brings together the power of desktop publishing and high-end image editing in one exciting package. Its versatility and user-friendly interface make it ideal for projects of all sizes, such as manuals, training guides, sales literature and newsletters. When you convert Corel VENTURA documents to PDF using Adobe™ Acrobat™ Distiller™ software, tables of contents and indexes are automatically converted into bookmarks and hypertext links, and crossreferences are converted into hypertext links. This means that you can quickly and easily navigate through the text and images in a PDF file created with Corel VENTURA software by simply clicking on hypertext elements. Corel VENTURA 5 is also loaded with great extras, including more than 17,000 clip art images; 100 photos on CD-ROM; more than 650 fonts; and Corel PHOTO-PAINT™, a powerful image-editing application that supports object layering, 32-bit CMYK images and plug-in filters that are compatible with Adobe Photoshop™. Available now for Windows®.

FrameMaker[®] and FrameBuilder[®]

Frame Technology Corporation

333 West San Carlos Street
San Jose, CA 95110
1-800-U4-FRAME
1-408-975-6000
Fax: 1-408-975-6605

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh is a registered trademark of Apple Computer, Inc. Frame, the Frame logo, FrameBuilder and FrameMaker are registered trademarks of Frame Technology Corporation. Windows is a registered trademark of Microsoft Corporation. Motif is a trademark of Open Software Foundation, Inc. UNIX is a registered trademark in the United States and other countries, licensed exclusively through X/Open Company, Ltd.

▶ FrameMaker software is a powerful, integrated document publishing application that supports multiple platforms and provides many high-end WYSIWYG word processing capabilities.

In addition to being completely file-compatible across Macintosh[®], Windows[®] and UNIX[®] X/Motif[™] platforms, FrameMaker lets you take advantage of predefined templates, full color capabilities and context-sensitive help. FrameMaker offers unparalleled power and performance for all your writing and publishing needs.

FrameBuilder software's import and export functions include a structure generator that allows the product to interpret the hierarchical structure of imported documents. Documents can be edited in a WYSIWYG authoring environment or a document structure view. FrameBuilder supports the SGML standard and provides an application program interface. FrameMaker and FrameBuilder support Adobe[™] Acrobat[™] technology by allowing easy navigation of Frame[®] documents that are converted into PDF.

InContext 2 for Windows® is an SGML text editor that speeds up the writing process by hiding SGML's complexity. InContext 2 works like any other Windows word processor, making it easy for you to take advantage of its style sheets, table editor, object linking and embedding capabilities, and many other advanced features. InContext 2 is a structured document tool that is both powerful and easy to use, bringing SGML document creation within reach of everyone in any organization.

InContext 2 also includes the popular Adobe™ Acrobat™ software, making it easy to view and manipulate SGML files that have been converted to PDF.

PreVIEW®

**Rosetta
Technologies, Inc.**
15220 N.W. Greenbrier Pkwy.
Beaverton, OR 97006
1-503-690-2500
1-503-531-0401
info@preview.com

PreVIEW is a high-performance application that lets users access, view, mark up and analyze product design data. PreVIEW provides users with a single point of access for design graphics and documents, supporting a wide range of raster, vector, CGM and 3D CAD data. PreVIEW is now integrated with embedded Adobe™ Acrobat™ software. Users can initiate a PreVIEW session and view multiple document types concurrently, create composite assembly views, and compare drawing revisions. Annotation capabilities, including support for lines, circles, arcs, text, pointers, multiple line fonts, ANSI drafting symbols and template libraries, allow users to create multiple transparent markups without modifying the original document. In addition, the PreVIEW application's measurement function gives users the ability to extract exact distance and angular and radial measurements, in English or metric units, from intelligent vector data, and visual measurements from raster data. PreVIEW supports Windows®, Macintosh® and UNIX® platforms.

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh is a registered trademark of Apple Computer, Inc. Windows is a registered trademark of Microsoft Corporation. PreVIEW is a registered trademark of Rosetta Technologies, Inc. UNIX is a registered trademark in the United States and other countries, licensed exclusively through X/Open Company, Ltd.

Cadmus Journal Services

Cadmus Journal Services

2901 Byrdhill Road
Richmond, VA 23228-5867
1-800-257-5531 x 3373
Fax: 1-804-264-3572

Cadmus Journal Services (CJS) was created in 1994 through the merger of the Journal Division of William Byrd Press and the former printing division of Waverly, Inc. CJS is a leading provider of information processing, packaging and dissemination services to the scientific, technical and medical (STM) publishing community.

CJS can create fully integrated electronic pages using an advanced composition/prepublishing model. It offers a superior platform for STM journal print production and effective reuse of information for electronic media products using Adobe™ Acrobat™ products. CJS is currently producing CD-ROM applications that use Acrobat software and is experimenting with the use of Acrobat in electronic page proofing for future prepublishing activities. CJS is licensed to reproduce and distribute the entire line of Acrobat software.

Computer Multimedia Productions Corporation

Computer Multimedia Productions Corporation

4707 140th Avenue North
Suite 203
Clearwater, FL 34622
1-813-531-7279
Fax: 1-813-531-7498

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh is a registered trademark of Apple Computer, Inc. Windows is a registered trademark of Microsoft Corporation. UNIX is a registered trademark in the United States and other countries, licensed exclusively through X/Open Company, Ltd.

Computer Multimedia Productions Corporation provides services for the creation of multimedia products that incorporate Adobe™ Acrobat™ software. This new approach to reproducing and distributing information can increase the profitability of new or existing publications.

Computer Multimedia Productions provides low start-up costs, easy transition from word processed or desktop published files, support of multiple computer platforms, and increased utility through the use of full-text search. Services include importing existing word processed or desktop published data; creating Table of Contents and full-text search indexes; embedding or linking audio and video; installing software; packaging; distribution on CD-ROM or floppy disk for DOS, Windows®, Macintosh® and UNIX® platforms; documentation; and cost/benefit analysis.

Computer Multimedia Productions will also convert conference proceedings to electronic form using Adobe Acrobat software, enabling you to provide your professional association membership with valuable, easily accessed information on the latest developments in your field.

Conference Master

GenText, Inc.

9400 N. Central Expressway
Suite 1640 LB 147
Dallas, TX 75231-5045
1-214-691-0300
Fax: 1-214-691-0789
gentext@metronet.com

If the cost of distributing mission-critical information is outpacing your budget, GenText has a solution: ConferenceMaster for Electronic Information Delivery for your host, workstation or PC!

GenText starts with your text files (from your word processor, mainframe or PC text editing system), merges them with scanned images of any hardcopy pages, and adds hypertext links, full-text search capabilities and fast-path access to specific points in the file via a master Table of Contents. Just have images? GenText can add indexing to make the images navigable in a logical manner and add keywords to aid in searching. Acceptable input formats include text; images; hardcopy; DCF, BookMaster™ and Waterloo Script source files; TIFF;™ PCX; flat ASCII and EBCDIC line printer files; HP PCL; Xerox® IMG; Microsoft® Word, WordPerfect®, Freelance®, PowerPoint® and Ventura™ files; IBM® Page Segment; and OS/2® and Windows® Bitmap.

(continued on next page)

Conference Master

GenText™ ConferenceMaster is available to your users through Windows Help, OS/2 Help, Adobe™ Acrobat,™ GenText's ViewMeta or IBM's AFP™ Viewer. Files can be delivered on diskette, or we can work with the IBM CD-ROM Publishing Group (or your own) to provide them on CD-ROM.

GenText ConferenceMaster is perfect for internal or external distribution of class materials, technical manuals, user conference proceedings or any other presentation material. GenText prices each project based on the pages and format involved. For specific pricing, call or send a fax with the details of your project.

Courier Corporation (EPIC)

Courier EPIC

15 Wellman Avenue
N. Chelmsford, MA 01863
1-508-251-1240
Fax: 1-508-251-0368

EPIC revolutionizes the way publishers develop, store, publish, preserve and distribute information. This new division of Courier Corporation works with publishers to maximize the productivity of their own in-house electronic publishing operations and to extend the means to deliver information to their customers. EPIC provides a range of custom solutions, including using Adobe™ Acrobat™ software, for up-to-the-minute information delivery via CD-ROM, diskette or any other electronic format.

For a recent project, EPIC worked with John Wiley & Sons to create a custom CD-ROM for university professors and their students. The CD allows professors to create their own course textbook by selecting and combining specific chapters from a wide selection of titles. Students purchase the book, navigate the contents of the resulting electronic textbook using Acrobat Reader software, and add their own sections.

Daniels Printing

Daniels Printing, in business since 1880, provides a broad range of multimedia services for commercial, advertising and financial industries. Daniels Printing converts printed materials, such as color catalogs, marketing collateral, training manuals, prospectuses and other financial documents, into PDF using Adobe™ Acrobat™ software. This material can be distributed by Daniels Printing through a wide variety of media, such as CD-ROM, floppy disk or on-line. Acrobat Exchange™ and Acrobat Reader software can also be distributed with the PDF-based documents.

Dataware Technologies

Dataware Technologies

222 Third Street
Cambridge, MA 02142
1-617-621-0820
Fax: 1-617-621-0307

Dataware Technologies is a leading worldwide supplier of products and services to the CD-ROM and on-line marketplace. Dataware's comprehensive suite of software products and services gives commercial publishers, corporations and government agencies a quick and easy way to create, update and publish information applications on CD-ROM.

With Adobe™ Acrobat™ software, Dataware Technologies offers information providers a way to convert documents created in virtually any authoring system into PDF files and provides sophisticated, multiplatform indexing facilities to enhance full-text searching of PDF files. These files can then be published on a single CD-ROM for use on the platform of your choice, including Macintosh®, DOS, Windows® and UNIX®. In addition, Dataware Technologies will include Acrobat Exchange™ or Acrobat Reader software on your CD-ROM.

R.R. Donnelley Global Software Services

**RR DONNELLEY
& SONS COMPANY**

R.R. Donnelley Global Software Services

77 West Wacker Drive
Chicago, IL 60601
1-617-466-9155
1-800-GOLD424

R.R. Donnelley is licensed to reproduce and distribute the entire line of Adobe™ Acrobat™ software. For OEMs, VARs, system integrators and traditional publishers that want to include Acrobat with their content, R.R. Donnelley is a source. In addition, R.R. Donnelley converts information into multiple forms and formats for global distribution. R.R. Donnelley also provides a broad set of high-value services that help ISVs, OEMs and VARs efficiently create, manufacture, package and distribute intellectual content around the world. Donnelley offers full CD-ROM services, translation/localization and package design, as well as simultaneous worldwide releases and password unlocking for networks and CD-ROMs.

R.R. Donnelley Gold Publisher Pack®

**RR DONNELLEY
& SONS COMPANY**

Fax: 1-617-895-9739

R.R. Donnelley offers the Gold Publisher Pack, a product designed to meet the needs of new Adobe™ Acrobat™ publishers who require all of the tools necessary to design and distribute their content using APIs and/or full-text search. The Gold Publisher Pack contains Acrobat Pro 2.1 for Windows® and Macintosh®, Acrobat Catalog™ 2.1 for Windows, Acrobat Exchange™ LE with Search 2.0 for Windows and Macintosh, Adobe Acrobat CD Sampler, R.R. Donnelley Annual Report on CD-ROM, Test Drive CD-ROM, various informational pamphlets, sample Getting Started Guides and an order form.

R.R. Donnelley also produces CD-ROMs and fulfills orders for the Adobe Acrobat Getting Started Guides for Acrobat 2.1, Acrobat Pro, Acrobat for Workgroups and Acrobat Catalog.

Please call for pricing information.

D Soft CD-ROM Technology

D Soft

Sparrestraat 24
B-9920 Lovendegem Belgium
(09) 37270 41
Fax: (09) 372 41 66
Frank.Delanghe@infoboard.be
HR Gent 165429
BTW BE 740 232 536
Bank Cera 737-4152774-53

D Soft provides a full range of services and support for CD-ROM projects from the earliest phase to the end. D Soft is an authorized information publisher and is licensed to redistribute Adobe™ Acrobat™ products. Fully integrated electronic pages can be created from, for example, database or page layout software. The information can be indexed for full-text search.

Besides producing CD-ROMs for catalogs, reports, and the like, D Soft is especially active in the medical and paramedical markets. Recently, D Soft worked with another Belgium company, AMS, to create a number of CD projects in cooperation with Belgian universities. These CD-ROMs contain thousands of images and relevant information from different sources as well as Adobe Acrobat software.

Electronic Publishing Group

Electronic Publishing Group

Fax: 1-206-453-1556
cliff@pnwss.com

The Electronic Publishing Group offers a spectrum of electronic publishing services, including the conversion of print publications such as books, manuals and catalogs for distribution on CD-ROM or through on-line services such as the World Wide Web. We also develop information kiosks, training materials, on-line help and interactive advertising.

As an Adobe™ Acrobat™ integrator, the Electronic Publishing Group can convert a wide variety of documents into PDF, develop custom Acrobat user interfaces and create plug-ins that enhance Acrobat software's core feature set. We are licensed to distribute the entire family of Acrobat software products to content publishers, OEMs, ISVs and VARs. We also offer pre-mastering, mastering, replication and worldwide distribution.

The Electronic Publishing Group is committed to a collaborative development process that ensures your satisfaction at every stage of the project. We recognize that our customers are looking for reliable partners. Successful partnerships begin with an accurate estimate, continue with regular communications and conclude with timely delivery of an end product that meets your expectations in every way.

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh is a registered trademark of Apple Computer, Inc. GTI is a registered trademark of Jouve Software, Inc. Windows is a registered trademark of Microsoft Corporation. UNIX is a registered trademark in the United States and other countries, licensed exclusively through X/Open Company, Ltd.

Jouve, an international leader in electronic publishing, offers a complete line of products and services for electronic publishing and a very flexible approach to distributing information both on-line and via CD-ROM. Jouve provides commercial publishers, governments and corporations with solutions ranging from simple parts catalogs, to complex documentation and books, to full multimedia publications.

Experts in electronic publishing, Jouve first analyzes a customer's needs and consults on optimal solutions. Using GTI® Publishing Software, which offers some of the most advanced full-text retrieval techniques on the market, Jouve can tailor applications to customers' specifications project by project.

Jouve has integrated Adobe™ Acrobat™ software into GTI in order to offer its customers the flexibility of publication based on PDF. Since GTI operates on Macintosh®, Windows®, DOS and UNIX® platforms, the use of Acrobat software to manage PDF files adds portability across platforms as well as many functions to view and manage documents.

Knowledge In Motion, a reseller of Adobe™ Acrobat™ products, can put Acrobat software on CDs along with documents, for simplicity of distribution and ease of viewing, independent of computer platform. Knowledge In Motion offers a complete package of services for CD-ROM, from front-end document preparation and development to making test CDs and premasters.

Andy Young, founder of Knowledge In Motion, has earned a growing reputation as a problem-solving expert in electronic document formatting, Acrobat software and CD-ROM production. His clients include universities, high-tech companies, publishers and manufacturers. For data preparation, PostScript™ language files, hypertext authoring, conversion, scanning, software or replication, let Knowledge In Motion solve your electronic document and CD-ROM needs.

Magnetic Press

Magnetic Press is a one-stop digital document shop for firms seeking help in electronic document publishing. From document conversion and hypertext authoring to developing business cases and marketing programs, Magnetic Press helps customers build successful electronic publishing businesses with Adobe™ Acrobat™ software products. Current customers include book, magazine and directory publishers; software companies; advertising agencies; and business-to-business marketing firms.

Document Management 34

With faster and faster product cycle times, companies relying on paper-based communication face an enormous challenge coordinating the creation, distribution and annotation of documents with functional groups that need access to the same documents at the same time. To make documents more productive and accessible to its clients, Andersen Consulting has established a Document and Complex Data Management consulting service, capable of developing and installing local, national and global solutions.

As a component of its custom document management solutions, Andersen Consulting has employed Adobe[™] Acrobat[™] software along with products from other software solution providers. Other services include Document Management Business Case Development; Project Planning and Management; Process Re-engineering; and Integration/Development assistance with structured editing and authoring, workflow management, database publishing, configuration management, and document distribution and retrieval.

**Hercules Defense
Electronics Systems, Inc.**
13133 34th Street North
Clearwater, FL 34622
1-813-572-1900
Fax: 1-813-572-2395

The AnyImage product line from Hercules Defense Electronics Systems enables users to electronically capture, store, retrieve and view volumes of technical documentation. Through user-developed rules, the AnyImage InfoLinker™ product can automatically build hyperlinks and bookmarks for PDF documents. AnyImage InfoLinker uses Adobe™ Acrobat™ technology to convert large amounts of information into PDF, automatically apply hyperlinks and deliver PDF files with Acrobat software.

Organizations that typically generate large amounts of information can have a paperless, more manageable, cost-efficient method in which to view, navigate and distribute documents.

Documentum, Inc. is a leading developer and marketer of software products for enterprise document management. The company offers the Documentum Enterprise Document Management System (EDMS), a family of open, client/server software products designed to help Fortune 1000 companies create and reuse their intellectual capital effectively across the enterprise.

The Documentum Server™ operates as an application server and provides a distributed “Docbase,” an object-oriented repository that stores and manages all types of “Docobjects,” ranging from text, images and graphics to multimedia and workflow. By means of Adobe™ Acrobat™ Distiller,™ Docobjects are transparently stored as PDF files in the most appropriate storage system, whether it’s an RDBMS, a network file system or an optical library.

Documentum, Inc.
4683 Chabot Drive
Pleasanton, CA 94588-2748
1-510-463-6800
Fax: 1-510-463-6850

Documentum Workspace™ is a graphical user environment that provides all the functionality you need to manage and accelerate your critical processes right on your desktop. Documentum Workspace is available for Windows®, Macintosh® and UNIX®/Motif™ platforms. Acrobat Exchange™ technology is tightly integrated with Documentum Workspace to present all the services of the Documentum Server in a highly intuitive, easy-to-use interface. Using Documentum Workspace and Acrobat software, you can transparently access any distributed document or business database.

Documentum, Inc.

4683 Chabot Drive

Motif is a trademark of Open Software Foundation, Inc.

UARCO Incorporated
700 West Main Street
Barrington, IL 60010
1-708-381-7000
Fax: 1-708-381-0917

UARCO's FIT Network is an electronic communications service for automating image and document activities. It includes management and administration tools for controlling document composition, specifications, inventory and ordering. FIT Network is fully functional in both networked PC and standalone workstations. It is designed to provide the most powerful tools available for document management while maintaining a format that is easy to understand and operate.

The FIT Library module of FIT Network incorporates Adobe™ Acrobat™ products. The Library module is used for version control, management of graphic standards and other document management issues. In networked situations, FIT Library facilitates print-on-demand for low-usage documents.

By employing the FIT Network, document administrators and users are able to concentrate their efforts on using the documents and information they need—not on finding or creating them.

FORMTEK:TDM™**FORMTEK, Inc.**

602 Baltic Way
 Sunnyvale, CA 94089

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh is a registered trademark of Apple Computer, Inc. FORMTEK is a registered trademark and FORMTEK:TDM is a trademark of FORMTEK, Inc. AIX is a registered trademark of International Business Machines Corporation. Solaris is a registered trademark of Sun Microsystems, Inc., which has not tested or approved this product. UNIX is a registered trademark in the United States and other countries, licensed exclusively through X/Open Company, Ltd.

FORMTEK:TDM is a robust data management system that provides the ability to create, store, search for, control access to, retrieve, edit and distribute data objects of any type. TDM is designed to be the foundation for an enterprise-wide product information management system (EPIM), with its scalable, modular architecture of pure client-server design. TDM approaches data access in a task-oriented manner, providing the data representation and manipulation or viewing tool appropriate to the computing platform and the user's role in the work process.

Unlike other information management systems, FORMTEK:TDM allows a document or sheet to be represented by more than one data type. For example, TDM can manage both a 3D CAD model for design and an Adobe™ Acrobat™ 2D representation of the model as part of the same object. This unique feature of the data manager facilitates program-wide computing by providing the right data format for the right task. The server product is currently available for UNIX® platforms (HP-UX, Solaris® and AIX®), and the client is available for those platforms plus Macintosh® and PCs.

Adobe, Acrobat and Distiller are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh is a registered trademark of Apple Computer, Inc. ViewFlow is a trademark of Cascade Systems, Inc. Windows is a registered trademark of Microsoft Corporation. UNIX is a registered trademark in the United States and other countries, licensed exclusively through X/Open Company, Ltd.

The ViewFlow system provides a dynamic visual window into the production status of a magazine, newspaper or other time-critical publication. As an example, the system may be configured to track the production status of any page or job and display this to the manager graphically on a PC using histograms, pie charts and Adobe™ PDF files. The user is automatically notified if pages or page elements are missing or behind a predetermined schedule. The system uses Acrobat™ Distiller™ and Reader to provide dynamic page views for status monitoring and soft proofing purposes.

Cascade Systems is a new company, founded in 1993 by a team of publishing system professionals with a track record of success. With offices in the United States and the United Kingdom, the company has a mission to provide innovative products and services that allow customers to archive and manage their data with a view toward electronic delivery of products and services into the next century. Cascade Systems is an integrator of Adobe Acrobat software and has development expertise in UNIX®, Windows® and Macintosh® environments.

VueFinder is VARTEC's enterprise information management system, a UNIX® system-based client-server software package that uses the TCP/IP communications protocol and a server-based RDBMS. Through a desktop-independent graphical user interface, VueFinder system's document management and workflow automation allows LAN/WAN environments to share information on Macintosh®, PC/Windows® and UNIX workstations. VueFinder, in conjunction with Adobe™ Acrobat™ software, allows the sharing of files, regardless of type and media, by providing organization, centralization and security.

VueFinder makes files accessible and easy to locate. It provides version control and gives data reliability by preventing conflicting changes, redundant effort and uncertainty of validity. In addition, the ability to access sensitive and confidential information is restricted. VueFinder allows workgroups and individuals to designate which information will be shared within a structured and secure framework. The information can be text, graphic, image or binary data.

Compose is an Adobe™ Acrobat™ plug-in product that streamlines document production tasks. Compose creates bookmarks and hypertext links with ease, saving you time and effort. Compose helps you quickly build and repaginate composite documents and lets you build a library of PDF documents for easy selection.

The Compose Bookmarks By Example tool scans your documents for headings and automatically creates bookmarks. It's the simplest way to give your document a table of contents. The process is easy. You start by identifying an example of each heading style for which you want to create a bookmark. Compose scans the entire document and converts matching headings into well-organized hierarchical bookmarks.

The Copy Link tool automatically copies hypertext links in a PDF file to another PDF file, saving you the time it would take to manually recreate the links. For example, many document authors like to place “next page,” “previous page” and

Fax: 1-415 428 0163

“table of contents” links on each page. This makes the document interactive and gives it a visually distinctive look. Copy Link eliminates the need for manually creating each of these links on every page.

The Document Composer tool creates a single composite document from a set of individual PDF files. Do you have to compile and repaginate reports or submissions with documents from several authors? You’ll love how Document Composer automates this time-consuming chore with just a few mouse clicks. You can even add custom headers and footers to your new document.

The PDF Launcher is an alternative file selection interface for Acrobat Exchange.™ Instead of selecting a file using the Acrobat file selection dialog box, the PDF Launcher displays a table of document titles so that users can pick the relevant document quickly and easily.

Available for Windows®; call for availability on Macintosh®.

▶ PDF NAVigator is a PageMaker™ 5.0 plug-in for Macintosh® computers that automatically adds the navigational capabilities of Adobe™ Acrobat™ to PageMaker documents. Bookmarks and links are generated for PageMaker Table of Contents and/or Index Stories. Once your PageMaker document has been processed by PDF NAVigator and converted to PDF by Acrobat Distiller™, simply click on a topic of choice in the document's index or table of contents and you immediately transfer to the associated text in the body of the PDF document. In addition, PDF NAVigator allows you to automatically generate thumbnails of each page, crop pages to a custom page size, compress text and graphics using LZW compression, and embed fonts in your Acrobat documents. All this is done automatically within PageMaker.

Suggested retail price: \$69.95

Re:mark is an Adobe™ Acrobat™ plug-in for document review and markup in a workgroup setting. Now you can distribute documents electronically for review and receive comments back electronically, thereby eliminating paper drafts floating around the office.

Re:mark annotates any document in Adobe's Portable Document Format. Reviewers' comments become part of the document returned to the author. Re:mark adds a rich set of markup features to Acrobat, such as text highlighting, text strike-out, pop-up comments and drawing tools. Its unique one-click pop-up comment box lets you enter descriptive text for any Re:mark annotation.

You can use the ink drawing feature to sketch diagrams and highlight text right on the document, using a mouse. It's just as easy as using pen and paper. Circle a paragraph and draw an arrow to show where it should be moved. Cross out unwanted text with a big "X." You can even write on the document!

 Software Partners, Inc.

Software Partners, Inc.
2013 Landings Drive
Mountain View, CA 94043
1-415-428-0160
Fax: 1-415-428-0163
sales@buckaroo.com

The file attachment feature lets you send original source documents to reviewers—and lets them attach materials for you. You can attach any picture, bitmap, sound file, movie, spreadsheet, text file or other file type anywhere on the document. And, since attachments become part of the document, they never get lost when the document is circulated for review. Any attached file can be extracted as a separate file, copied to the clipboard or launched with its associated application program. Reviewers will love it!

Re:mark software's nifty sound annotation lets you record verbal comments right in the document. Hearing the reviewer's voice provides a valuable context that you just can't get on paper. That's right—you can applaud, cheer or scream!

Re:mark lets you consolidate comments from multiple reviewers. You can look at each reviewer's comments separately or combine them for a consolidated view. Re:mark lets you filter comments by author and annotation type.

To order, call Software Partners.

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh and AppleTalk are registered trademarks of Apple Computer, Inc. Trapeze is a trademark of Crosswise Corporation. Windows is a registered trademark of Microsoft Corporation. NetWare is a registered trademark of Novell, Inc.

The Trapeze family of Adobe™ Acrobat™ 2.1 plug-ins provides document distribution and real-time document conferencing.

Trapeze File Exchange lets Acrobat 2.1 users transfer PDF documents or any standard file on a Macintosh® or Windows® system to remote Acrobat 2.1 users over TCP/IP (the Internet), NetWare® (Windows only), AppleTalk® (Macintosh only), standard modems and ISDN networks. Files are compressed prior to transmission, users are easily identified by means of the built-in address book, and transfers are accomplished with the push of a button. Trapeze File Exchange costs \$59 per copy.

Trapeze Live! extends the power of Acrobat 2.1 across a network of Macintosh and Windows systems to provide "live" interactive review of PDF documents. Trapeze Live! users can simultaneously view PDF documents and page, scroll, zoom and search through PDF files while on the telephone. Trapeze Live! lets users review documents instantly with colleagues, managers or suppliers.

Call Crosswise for pricing of Trapeze Live! and other enhancements for Acrobat software that enable audio- and video-conferencing capabilities.

VerZions software is an Adobe™ Acrobat™ plug-in that provides advanced document workflow solutions in automating, managing and expediting the conversion of the printed page to an electronic format.

With VerZions, you can create a completely flexible, automated workflow environment to control each phase of the conversion process. As an enhancement tool, VerZions will take you from document breakdown and separation, through page scanning, PDF conversions and quality assurance, all the way to product reassembly, to include page numbering, indexing, hypertext linking and archiving.

After conversion, documents become even more interactive. Not only are they all in the same format, they can also be searched and retrieved based upon information supplied by VerZions, such as key words, date of origin, and destination. They are also fully available to users on any computer system throughout the organization.

▶ **XMAN's** xToolsOne contains 10 Adobe™ Acrobat™ 2.1 plug-ins. *xMarker's* electronic ink allows you to place marks on Acrobat documents. Tailor your editing needs by controlling the color and pen width and noting the creator of electronic marks.

xPrint Selection enables you to easily choose a specific portion of a page and print only that area.

xSelect is a powerful and flexible tool that enhances Acrobat software's built-in text selection tool. Use *xSelect* to choose text on a page within a user-defined rectangle.

xAnnotations Window allows you to examine all annotations in an Acrobat document. When *xAnnotations Window* is shown, a detailed list is created that includes the type of annotation, the page location and the creation or last modification date. More specific annotation information is also available: for text notations, you are shown the title; and for links, you see the page number the link jumps to or the document the link will launch.

xShowLink Borders shows all invisible link borders on a page. You can continue working with other tools and still view the link borders. *xShow Link Borders* ensures that you and others have access to all of the links in any given document.

xPageMarker puts a marker on any page you choose in your document. A corner of the page is folded down for easy reference. And *xPageMarker* notation is also added to the *xAnnotations Window* list.

xFootnote creates a standard footnote for you in one easy step. Simply select some text in a document, choose *xFootnote* from the menu, and this utility appends footnote information for the document and cuts the text to the clipboard for use in other applications.

xDate Annotations ensures that a creation date is assigned to all annotations and makes tracking your revisions of links, marks and notes easy.

xMake Links cuts link-making time in half. This tool turns linking a range of text into one easy step. Designed for table of

Business Network, part of GE Information Services, Inc. (GEIS) Commerce*Express Services Portfolio, is a comprehensive information management system that includes electronic messaging, information management tools, worldwide access and support. Business Network offers access to on-line databases, bulletin boards, search/retrieval services, customized business intelligence and electronic news clipping services. GEIS offers Business Network users the full range of Adobe™ Acrobat™ 2.1 products, which complement Business Network by enabling users to create feature-rich electronic documents that can be viewed, searched and printed from virtually any computer or printer on the GEIS worldwide network. PDF documents can be posted on Business Network Information Manager or sent as electronic mail. The combination of Acrobat 2.1 with GEIS Business Network Service facilitates effective universal document communication.

GEIS's portfolio of Commerce*Express Services provides secure and reliable exchange of business-critical information between companies. Today, more than 25,000 businesses use GEIS services. GEIS also offers GENie, a leading on-line information service.

▶ For ten years, First Call has been delivering Wall Street broker research, morning meeting notes and commentary to the investment community. Now, with FIRST CALL Research Direct, broker analysts can send their in-depth research reports, created in virtually any format, direct to the desktops of institutional investors worldwide. And because they use Adobe™ Acrobat™ software, these visually rich, full-color reports retain all their original formatting. In seconds, users can retrieve the reports they need using the Research Direct system's high-powered custom search features. Or they can use the alert feature to monitor the market for up-to-the-minute research on the companies and industries they cover. FIRST CALL Research Direct is available on a dedicated terminal or through desktop PCs via a local area network on a Windows® system.

The GINA software product is a point-and-click graphical tool for navigating the Internet. It is designed to work with Macintosh® and Windows® environments. GINA removes many of the barriers to using the resources on the Internet and makes access intuitive and easy to learn. These qualities make it an ideal tool for anyone interested in using the Internet. GINA is packaged with a copy of the powerful Adobe™ Acrobat™ Reader software. Use GINA software to easily access mail, conferencing, bulletin boards, databases, library catalogs and other information resources, many of which are available as PDF files.

MG Harrington Co specializes in providing computerized information management for corporate legal departments and law firms. MG Harrington believes lawyers and support staff should be free to concentrate on substantive matters, using MG Harrington's expertise to provide systems that reduce the effort in organizing and finding information. MG Harrington provides systems for full-text searching or managing files, expenses, diaries or budgets.

The powerful Adobe™ Acrobat™ 2.1 system enables the user to search transcripts and manuals efficiently for specified words or phrases, or insert comments or annotations in long documents. Statutory sections from various states may be compared or searched. If an office generates multipage documents, pages may be linked so users can quickly reach related sections or go from a table of contents to text.

MG Harrington prepares the information or documents, and then provides software for the customer to use. All software is menu operated, eliminating the need for extensive computer experience.

The Siebel Sales Information System is a comprehensive sales and marketing information system that empowers sales professionals with comprehensive market, customer, product and competitive information systems. The Siebel software is groupware-enabled, supporting team selling across field sales, telesales, telemarketing and third-party distribution in multi-national organizations.

Built on a modern client-server technology foundation, Siebel software supports Microsoft® Windows® clients, including nomadic laptop computers and a variety of Windows NT™ and UNIX® servers running Microsoft, Oracle®, Sybase™ and Informix® SQL-server engines. Adobe™ Acrobat™ software integration provides the sales professional with access to an integrated marketing encyclopedia of all sales literature, available electronically. The Siebel software's object-oriented design offers a new dimension in configurability to meet each customer's unique sales information requirements.

Adobe Systems Consulting Service

**Adobe Systems
Consulting Service**
1-800-27-ADOBE

▶ Adobe has formed a consulting service group to help companies integrate Adobe™ Acrobat™ software into their network, document management, publishing or other electronic systems. The group provides engineering support for companies that need technical expertise on Acrobat software and the Adobe PostScript™ language. The service is offered on an hourly or retainer basis.

Interested developers should contact their local Adobe Acrobat account representative, or call 1-800-27-ADOBE.

MEREX, Inc.

3206 Tower Oaks Blvd.
Third Floor
Rockville, MD 20852
1-301-816-0500
Fax: 1-301-816-0504

MEREX, Inc. is a systems engineering consulting and integration services firm specializing in electronic document solutions. The firm's capabilities encompass all aspects of design, development and implementation of electronic document systems. Merex specializes in open systems based on client-server architecture.

From a single workgroup with its own secure private document repository to an enterprise-wide solution that ties users from around the world into multiple technical libraries, MEREX designs and implements solutions that fit the customer's unique needs. MEREX has been successful in implementing Adobe™ Acrobat™ products into flexible, scalable systems that suit the customer's existing work processes, including integrating Acrobat as the viewing technology to a large full-text search database, which uses hyperlinks and seamlessly launches Acrobat software automatically.

MEREX can provide turnkey solutions using commercial off-the-shelf products, with functional customizations as desired, to integrate state-of-the-art technologies, some of which have never been integrated before.

Stephan Jaeggi
Bottmingerstrasse 92

▶ PrePress-Consulting of Switzerland is supporting users in building electronic publishing solutions with Adobe™ Acrobat™ technology. Some examples of actual projects include:

- Electronic archives for newspapers, magazines and marketing material
- CD-ROM with legacy documents
- Digital distribution of advertising
- Electronic approval for printed brochures
- Information system for a museum (based on the printed catalog)
- Printing-on-demand system
- Publishing of PDF documents on the Internet

PrePress-Consulting is also developing methods to automate the creation of PDF documents and PDF enhancements (links and bookmarks).

Stephan Jaeggi regularly teaches Acrobat seminars in Germany and Switzerland and offers in-house training for Acrobat users.

▶ Software Partners develops customized plug-ins for organizations needing specialized features in Adobe™ Acrobat™ or integration of Acrobat software into a systems solution. Software Partners has developed plug-ins for companies in the information publishing, software tools, on-line services, pharmaceutical and telecommunications markets.

Our plug-in development experience is quite broad. Software Partners has developed customized plug-ins for content extraction, document navigation, access security, file synchronization and specialized printing. Several of our systems integration projects allow other software packages to exchange data and interact with Acrobat Exchange™. As one of the very first Acrobat plug-in developers, we developed a number of the plug-ins in the Acrobat 2.0 software developer's kit for Adobe. With this extensive background, we are ideally suited to help you build and field Acrobat applications.

We invite you to give us a call. One of our engineers will be happy to discuss the specifics of your plug-in development project at no obligation to you.

▶ **DPI Services** is a Premium Lotus Notes® Business Partner specializing in Lotus Notes consulting. The integration of Adobe™ Acrobat™ PDF files with Lotus Notes provides a facility for document management, electronic distribution and concurrent access of PDF files throughout an organization, thus significantly reducing the requirement for paper communication.

DPI Services provides technical support for the development and installation of custom Lotus Notes applications, Adobe Acrobat and Lotus Notes API programs, and document management solutions that merge the capabilities of Lotus Notes and Acrobat. With a broad range of system implementation experience, DPI Services can help clients rapidly implement Lotus Notes–based document management solutions that effectively solve business problems while minimizing risk.

xnet

1500 City West Blvd.
Suite 500
Houston, TX 77042
1-713 782 9929
Fax: 1-713 782 9979

xnet is a consulting and integration company specializing in the design, development, and implementation of customized client-server solutions. Using Lotus Notes®, Adobe™ Acrobat™ and other integration tools that are based on open systems architecture, xnet builds applications that increase the efficiency and effectiveness of a client's business process. Complex documents containing text, graphics, drawings, and maps converted to the Adobe Portable Document Format (PDF) can be incorporated into the Lotus Notes environment to support multiple geographic sites, workflow routing, cross-platform networks, document management, searching and archiving.

xnet personnel are trained and experienced in evaluating and mapping clients' business processes, which are then matched with available technology. Using Lotus Notes, consultants and project managers document models for re-engineering and automation while maintaining a focus on change management, risk management and resulting financial benefit. Value to end-users and management is presented as quickly as possible and continually improved until the desired results are achieved.

IBM Software Manufacturing Solutions

6300 Diagonal Highway
Boulder, CO 80301-9191
1-800-926-0364

▶ For PC users, the IBM® CD Showcase discs let you browse through and try a selection of software applications before you buy. The discs are customized and distributed by a variety of software resellers and publishers, each of which encloses up to 100 applications as well as electronic documentation and marketing materials. By customer request, CD Showcase discs can include Adobe™ Acrobat™ Reader software for viewing and printing these electronic files in PDF.

Insert the CD Showcase disc into your home system and sample the programs. When you're ready to make a purchase, simply call toll-free and use your credit card to purchase access codes for the products you want. Then download and install your new software in minutes.

Softbank On Hand™

Softbank On Hand
60 Garden Court #250
Monterey, CA 93940
1-800-SOFTBANK
Fax: 1-408-644-2098

▶ Softbank On Hand is a CD-based product that allows customers to preview Windows® software programs that are encrypted on the CD. If customers decide to purchase a product, they can install the full, unencrypted version directly from the CD.

Software manufacturers whose products are available for sale on the CD are using Adobe™ Acrobat™ software to provide electronic versions of their documentation. Although hard-copy documentation is available to customers, the use of electronic documents viewed with Acrobat software provides the user with an immediate, on-line version of a product's manual. Not only does the customer benefit from having an immediate full set of documentation, but the software vendor can also significantly reduce its cost of goods.

AlphaGraphics® Printshops Of The Future®

alphagraphics®
Printshops Of The Future

For the participating
AlphaGraphics store
nearest you, call:

**AlphaGraphics Support
Services**

1-800-955-7778

Drop off your disk at your local AlphaGraphics Printshop and pick up your finished printed materials in your destination city. Save time, freight charges and customs delays.

AlphaGraphics worldwide is interconnected via AlphaLink®, a satellite communications network, and can transmit your electronic publishing files to more than 300 store locations for local output and production. Now using Adobe™ Acrobat™ software, AlphaGraphics provides the fastest, most convenient way to communicate or transmit documents for local publication, across the country or around the world. Acrobat software's file-compression capability makes rapid transmission possible for even the largest, most complex digital documents. By transmitting your PDF files via AlphaLink, AlphaGraphics gives you cost-effective distribution and publishing options that were never before possible.

▶ AP AdSEND sends ads electronically from advertisers to newspapers within hours or within minutes, when needed. Ads are transmitted and received digitally as standard computer files, preserving the original quality. Advertisers simply create ads on a computer—either a Macintosh® or a PC—using any combination of software programs. When the ad is ready, advertisers store the ad as a PDF file, using Adobe™ Acrobat™ technology. Acrobat software compresses the ad to make it easier and faster to transmit. This compressed file includes all fonts and final-form graphics, ensuring faithful reproduction of the ad across a wide range of typesetters.

By making full use of AP's communications system—including satellite delivery—and photo technology expertise, AP AdSEND provides advertisers with the same quality and delivery speed that revolutionized the delivery of news photos.

Associated Press

50 Rockefeller Plaza

Enhanced Mosaic™ from Spyglass

Spyglass, Inc.

1230 East Diehl Road
Naperville, IL 60563

1-708-505-1010

info@spyglass.com

http://www.spyglass.com/

Enhanced Mosaic from Spyglass is the premiere commercial Internet World Wide Web browser. The Enhanced Mosaic Software Development interface makes it possible to integrate Mosaic with other applications, such as Adobe™ Acrobat™, to view PDF documents. This means that documents created with conventional desktop publishing and productivity tools can be converted to PDF and published on the Web, complete with hyperlinks to other documents.

Enhanced Mosaic's Advanced Display Technology provides the highest possible performance and allows interaction with documents during downloads. The built-in Security Framework provides a choice of open-standard security solutions, allowing businesses to choose the electronic transaction security level appropriate to their needs.

InternetLink

InternetLink

The InternetLink plug-in software is available free via gopher or anonymous ftp from *boombox.micro.umn.edu*

Use this URL to gopher to the appropriate directory:
<URL:GOPHER://boombox.micro.umn.edu/11/gopher/Macintosh-TurboGopher/helper-applications

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh is a registered trademark of Apple Computer, Inc. Windows is a registered trademark of Microsoft Corporation.

InternetLink is an Adobe™ Acrobat™ 2.1 plug-in that was developed at the University of Minnesota. Using InternetLink and Acrobat 2.1, you can place links to Internet resources within a PDF file by entering the appropriate Uniform Resource Locator (URL). InternetLink extends the capabilities of the Acrobat link tool to let users enter links in PDF documents that refer to URLs for Internet resources such as ftp, gopher, netnews and WWW servers.

When a user selects one of the links that refers to a URL, the InternetLink plug-in calls the appropriate helper application for ftp, gopher, nntp or http servers. Available on the Macintosh® (Windows® to follow), InternetLink sends an OpenURL Apple event to signal the appropriate network application to fetch the URL. The network application either displays the item referenced by the URL or calls a helper application to display the item. For example, TurboGopher renders text, gopher searches and directories itself, but calls Acrobat to display PDF files. This means that you can use InternetLink and URLs to seamlessly link PDF documents residing on servers anywhere on the Internet.

Verity Topic[®] Information Agents

Verity, Inc.

1550 Plymouth Street
Mountain View, CA 94043
1-415-960-7600
Fax: 1-415-960-7698
info@verity.com
<http://www.verity.com/>

▶ Verity, a leading supplier of information retrieval products, provides the search engine that Adobe chose to embed inside Adobe[™] Acrobat.[™] Verity's Topic Information Agents allow users to search for and retrieve heterogeneous information across file systems, databases, local area networks and the Internet. Topic Information Agents provide the user with powerful concept-based retrieval using Topics—powerful knowledge objects that can automatically find information about a desired concept—not just keywords or Boolean techniques. Leveraging the efforts of others who have created relevant Topics, a user can search across multiple collections of information of various types and formats, throughout the company, and receive personalized relevant information without any knowledge of where it is stored.

Users can also program Information Agents to watch any collection of information and notify them whenever a relevant document is added or updated. For example, a user could

(continued on next page)

Verity Topic Information Agents

program one agent to monitor the news for stories about a subject of interest, another to await e-mail for messages on a particular project and another to watch a vendor's World Wide Web server for new or updated product documentation. When information of interest is found, the user is alerted, or the information can be delivered automatically as a PDF file. When PDF files are received, the Acrobat software is launched.

Topic Information Agents are available as client applications for Windows®, Macintosh® and Motif™ platforms; for enterprise-wide retrieval; and in Spyglass Enhanced Mosaic™ clients from Verity for retrieval across the Web.

Verity, Inc.

1550 Plymouth Street
Mountain View, CA 94043

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. IBM is a registered trademark and Advanced Function Presentation is a trademark of International Business Machines Corporation.

▶ If you've made the investment in Advanced Function Presentation™ but also need to share on-line documents in a PC environment, you can capitalize on your investment in both technologies with AFP2PDF. AFP2PDF runs on your mainframe, workstation or PC to translate IBM® Advanced Function Presentation datastream (AFPDS) files into the Portable Document Format (PDF) used by Adobe™ Acrobat™ products. PDF and Acrobat allow you to share complete documents electronically, including layouts, typefaces, illustrations, photographs and color.

AFP2PDF does not need a special box, additional hardware or even a magician! GenText created it to meet customers' requests for a more versatile display environment for their host-generated documents.

AFP2PDF accepts AFCCU (Common Control Unit) AFP and supports both external and embedded AFP objects, such as page segments, overlays and mixed-mode line data. GOCA and IOCA support is coming soon. Users who have implemented the IBM Core Interchange Fonts will find a direct correlation to Adobe Type 1 fonts that gives the same look and feel to their documents. And AFP2PDF will even handle color.

Corridor™ AFPDS to PDF

The Xenos Group Inc.
95 Mural Street, Suite 201
Richmond Hill, Ontario
L4B 3G2 Canada
1-800-387-9781
Fax: 1-905-709-1023

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. *Corridor* is a trademark of The Xenos Group Inc. IBM is a registered trademark and Advanced Function Printing and AFP are trademarks of International Business Machines Corporation.

▶ *Corridor* AFP to PDF transforms IBM® Advanced Function Printing™ datastreams (AFPDS) to PDF files, converting the datastreams into a portable, universally recognized format for viewing and printing with Adobe™ Acrobat™ products. The resulting output meets “light test” compatibility.

AFPDS to PDF accepts “mixed mode” (AAFPDS and IBM line mode) and “pure” (CCU-based, non-AFIG) AFP print streams; both external and embedded AFP objects such as page segments, Graphical Object Content Architecture (GOCA) files and overlays; and AFPDS at 240, 300 and 1,440 dpi. AFPDS to PDF accesses existing AFP resource libraries to select overlays, images and graphics. Normal library maintenance procedures remain in effect. AFPDS to PDF does not create redundant resources, files or processes.

The use of AFPDS to PDF provides for document portability over time, as all resources necessary for creating a document are stored with the text at the time of creation.

The Xenos Group develops production software for printing, viewing and archiving computer output, and has been servicing the output management marketplace for more than 15 years.

Elixir printing software brings the advantages of electronic documentation to mainframe users by converting documents to PDF files—a necessity for large businesses in need of cross-platform communication. Elixir’s printing software provides PC-based WYSIWYG resource editing and conversion tools for use with IBM® Advanced Function Printing™ (AFP™) and Xerox Corporation’s Metacode®. Elixir outputs PostScript™ language files that are seamlessly converted into PDF files using Adobe™ Acrobat™ Distiller™ software.

Elixir Technologies Corporation

180 Canada Larga Road
Ventura, CA 93001
1-805-641-5900 ext.140

Adobe, Acrobat, Distiller and PostScript are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Image Alchemy™

Handmade Software Incorporated

488 Kato Road
Suite 110
Fremont, CA 94538
1-510-252-0101

Image Alchemy converts vendor-specific, computer platform-specific or standardized image files into a form that can be viewed by an Adobe™ Acrobat™ Reader or Acrobat 2.1 user. Image Alchemy, the image conversion software from Handmade Software, converts more than 70 image file formats to PDF, including formats used by scanners and faxes or those posted to the Internet. Due to the compression supported by PDF, the files created may be substantially smaller than the originals, saving you valuable storage space. Image Alchemy also has a wide range of image transfer features, such as colorspace conversion and palette generation. Available for personal computers and workstations.

If your site is a Metacode® shop but you also need to share on-line documents in a PC environment, you can capitalize on your investment in both technologies with Meta2PDF. Meta2PDF runs on your mainframe, workstation or PC to convert Xerox® Metacode into the Portable Document Format (PDF) used by Adobe™ Acrobat™ products. PDF and Acrobat allow you to share complete documents electronically, including layouts, typefaces, illustrations, photographs and color.

Meta2PDF does not need a special box, additional hardware or even a magician! GenText created it to meet customers' requests for a more versatile display environment for their host-generated documents.

Meta2PDF accepts Xerox Metacode and line data conditioned with DJDEs. It supports both external and embedded objects, such as IMGs and FRMS. Fonts are supported by using a correlation table that maps the Xerox fonts to PostScript™ language fonts. The correlation table can be tailored to handle your customized fonts. Meta2PDF will even handle color.

Prepare®

Prepare is a data conversion tool that supports a wide range of standard graphics and data exchange formats. Standard data in TIFF,™ MIL-R, C4, Sun™ Raster, HP-GL, CGM, IGES, DXF and Adobe™ PostScript™ language formats can now be converted to PDF files. File processing supports multipage documents, and there are no restrictions on raster image size or resolution. Prepare supports automatic file type detection, batch processing, drawing merge and assembly, and vector to raster conversion. Available in Windows® and UNIX® versions.

Rosetta Technologies, Inc.

UNIX is a registered trademark in the United States and other countries, licensed exclusively through X/Open Company, Ltd.

Sys-Print software produces PDF files, complete with book-marks and links, from report generator output such as mainframe “sys-out” data. That enables large amounts of data to be stored, retrieved and searched quickly and easily on-screen. The software allows for fine control of output format through job specs and FCB parameters. MIS departments, especially, can benefit from this simple, revolutionary way to route information throughout a company. Since this information is distributed in PDF, the original presentation of each page is retained, complete with graphics and text. In addition, Sys-Print software uses PDF to reduce file size.

Adobe and Acrobat are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions.

Adobe's developer program for Acrobat gives application development partners the necessary tools to build products that take advantage of Acrobat's broad feature set. In addition, the developer program offers developers the know-how to effectively promote their Acrobat-related products to users. To assist developers in supporting Acrobat software, Adobe offers the Acrobat Software Development Kit (SDK) and the Acrobat Plug-ins SDK, \$500 and \$1,500 respectively. Both kits include a set of Application Programmer's Interfaces (APIs), Acrobat software, technical documents and examples. The Acrobat Plug-ins SDK also includes the Adobe Acrobat Viewer Plug-in Specification and sample code. Guidelines regarding Acrobat integration with third-party products and content details of the Acrobat SDKs are available through the Adobe Developers Association.

Production Essentials explores the complex world of the digital production process with all the clarity and precision readers expect from the Professional Studio Techniques series from Adobe Press. In the tradition of award-winning *Design Essentials* and *Imaging Essentials*, *Production Essentials* covers electronic production for today's graphic designers and production artists who use the tools in Adobe's software applications.

More than 20 industry experts have contributed their expertise to the making of *Production Essentials* including artists, photographers, professional consultants, engineers and digital prepress specialists who work with digital files every day of the year. Additionally, each topic has been tested by Adobe's technical staff and put to use with the most recent versions of Adobe's applications and advanced technologies, including Adobe Illustrator™, Adobe Photoshop™ and Adobe Acrobat™.

Published and distributed by Hayden Books, a division of Macmillan Computer Publishing.

To receive the “Train the Trainer” Class Schedule, call the automated FaxYI system at 1-206-628-5737

Registration:

To register for “Train the Trainer” classes, call: 1-800-27-ADOBE

▶ “Train the Trainer” classes are open to all instructors who want to experience the methods used to teach the Acrobat family of products. Classes are participative and assume a working knowledge of Adobe Acrobat.

The Electronic Publishing with Adobe Acrobat curriculum, exercises and detailed Instructor Notes provided in PDF files are the basis for teaching you how to teach others to use the Acrobat family of products. We focus on teaching the technical ins and outs of Acrobat applications to those who author, edit, manage and distribute documents electronically and those who support Acrobat users. Information on all topics is accessible for reference on the CD-ROM included with the class material.

Topics include going on-line with documents, Acrobat security, Acrobat Distiller™ in-depth, CD-ROM publishing with Acrobat and PDF files, Adobe Type Manager™ using PDF Writer, Acrobat printing issues, Acrobat Catalog™ and Search, understanding the PostScript™ language, using Acrobat as an

(continued on next page)

Adobe Acrobat “Train the Trainer”

archiving tool, understanding formats in-depth, inside PDF, image compression, downsampling and interapplication communication.

Course material provided includes three multiplatform CD-ROMs: Adobe Acrobat Instructor, Discovering Adobe Acrobat, and Electronic Publishing with Adobe Acrobat.

Prerequisites: familiarity with Macintosh® or Windows® platform. The Discovering Adobe Acrobat course is recommended.

Course length: 2 days

Price: \$450

Platforms covered: Macintosh and/or Windows

Class schedule:

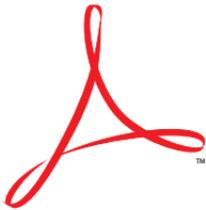

To receive the “Train the Trainer” Class Schedule, call the automated FaxYI system at 1-206-628-5737

Adobe, Acrobat, the Acrobat logo, Acrobat Exchange, and Distiller are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions. Macintosh is a registered trademark of Apple Computer, Inc. Windows is a registered trademark of Microsoft Corporation.

Offered by Adobe Systems, this course gives Adobe Acrobat users the skills they need to work efficiently with Adobe Acrobat Exchange™, PDF Writer and Distiller™ software. Attendees explore how Acrobat technology works within the structure of today's workplace. The course provides a solid foundation for applying Acrobat features to real-world situations. The hands-on curriculum specifically addresses the demands of users in publishing, education, financial, advertising and pharmaceuticals industries, and other users will benefit as well. Topics include using Acrobat in mixed-platform environments, creating and using PDF documents, how Acrobat application features can be used to tailor a document to its audience and using Acrobat as a presentation tool. This one-day workshop is designed for document authors, editors, managers and anyone using Adobe Acrobat products for electronic document distribution.

The curriculum for the course is available on CD for \$24.95.

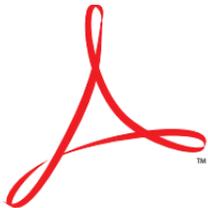

Course length: 1 day

Price: \$200
