=====

Problem Set of macros that automate the process of retrieving messages from the Symphony bulletin board on the World of Lotus.

Tips

String formula - self modifying macros C32 and C33

Handshake commands C12..C22

"TRY" error handling routine is fancy but doesn't seem to work correctly.

Good macros for automating Communications procedures.

Press Alt-M for main menu.  
Press ENTER key to leave Find mode. Right-arrow key works in Find.  
Do not erase a criteria cells contents by entering a space. Use Alt-E.  
App# must be entered as a label in criteria row.  
All main menu options can be executed by Alt-letter keys.  
You must enter your own printer Setup string with /ppos cmd.  
Macro routines do not alter margins. You are free to change them.  
Decide on App# before selecting Review option (Alt-R)  
Press F9 key to see how many records meet current criteria --->

## Sheet1

To allow Lotus users to quickly locate applications in our library containing information they can USE. See PNWLIB.DOC.

To achieve this, a documentation file has been prepared for each of the 200+ applications listed in this directory. Each of these documentation files is layed out as follows:

- I Problem Definition: One paragraph describing the specific problem the application attempts to solve.
- II Block Diagram: A birds-eye view of how the spreadsheet has been layed out.
- III Tips/Techniques: A listing of useful tips and techniques applied in the application with cell references.

A disk containing these documentation files is available for \$10. The applications themselves are on 17 disks which are available for \$10 each, or \$145 for the entire library. If interested send payment to: PNW Lotus User Group
