

*Peter Neuendorffer is a programmer with a growing client list here and abroad. He is the author of a transit program for the Boston transportation system (MBTA125A.ZIP) which assists riders in finding their train route. Most recently he has developed Ibid List Maker 2.0 for Windows which predictably creates lists or a browsing multi-linking data base. (IBID20.ZIP)*

*Peter can be reached at [peterne@channell.com](mailto:peterne@channell.com)*
