

Thank-You for evaluating Format!, the easy way to format disks in Windows.

Installing Format!

1. Unzip Format!.Zip to a blank, formatted diskette.
2. From Windows Program Manager Choose FILE/RUN
3. On the COMMAND LINE type F:\SETUP (Where F: is the drive containing the installation diskette)

Disclaimer

FORMAT!,version 1.2 is Freeware - distribute like crazy. Format is received As Is and Corey Tucker accepts no responsibility in data loss, user error, drive corruption (highly unlikely),etc. Please refer any questions or comments that you may have to:

Corey Tucker, CompuServe ID 72772,72

Propaganda

You can upgrade to the full version of Format! for only \$5.00! By upgrading you will get:

- + AUTO-SENSING, no more choosing the media type Auto-Sense does it for you!
- + Full Technical support!
- + Free future upgrades!
- + Advanced notice of new products!

Not bad for \$5.00! As always, the evaluation versions have **NO NAG SCREENS!**

Enjoy!!!
