Preferences

The Preferences card is broken into seven sections, selected from the buttons located at the top center of the card:

Editor Preferences
General functioning of the editor, eg. text wrapping, font and size, WWW browser choice, hilight font and style, report template, etc.

HTML Preferences
HTML specific syntax options, customizable tag tables, return key functioning, etc.

Paths & Labels Preferences
Server name and port, server path (location of server), labels, etc.

Import/Export Preferences
Text file handling on import and export: file creator setting, translation on export options, server platform, etc.

Conversion Preferences
Conversion tables for Preprocess, Table Convert, Custom Entity and RTF.

Compacting Preferences
Freespace auto-compaction preferences.

Libraries Preferences
Hotlist (URL), Clip (text), and Image (image URLs) Libraries.

Back to Command Keys, on to Tool Palette Menus, or return to Contents.
