**Win Manager was feature in the April, 1994 issue of PC/Computing Magazine.**

Win Manager is a utility designed to serve as an enhanced replacement for the Windows File Manager run commands.

## **Files:**

<b>manage.exe</b>	<b>Executable file</b>
<b>manage.wri</b>	<b>This file</b>

You also need Visual Basic Runtime 3.00 (VBRUN300.DLL) installed in your Windows System directory.

## **Instalation:**

Copy Win manager to a directory of your choice and create a new program group.

## **Instructions:**

To execute a file highlight it and double click with the mouse, the executable file runs in normal mode mode as default, or you may select the file and click one of the executable buttons to run it Minimized or maximized.

## **View Images:**

Double click on any .BMP, .RLE, .ICO or WMF file formats to view it or you may select the image and click on the view button.

## **Editing Files:**

By default Win Manager uses Notepad.exe as its editor, you may change to any editor of your choice by clicking on the editor button. To edit highlight the file and click on the edit button.

### **Move a file:**

Select the file you want to move and click on the move button, select your destination directory and click on the OK button.

### **Delete:**

There are two ways to delete a file Normal & Secure, with normal delete you will be able to undelete the file with DOS UNDELETE with SECURE you will NOT be able to undelete the file Win Manager overwrites the contents of the file before performing the delete.
