The Shareware Concept

JCSM Shareware CD-ROM

JCS Marketing, Inc. publishes a Shareware CD-ROM three times a year. Individual issues, and subscriptions, are available. Additions and updates are applied between every issue. When you register, you will receive a certificate, presentable to JCSM, that entitles you to one edition of the CD-ROM at half price. Just mention you saw this offer.

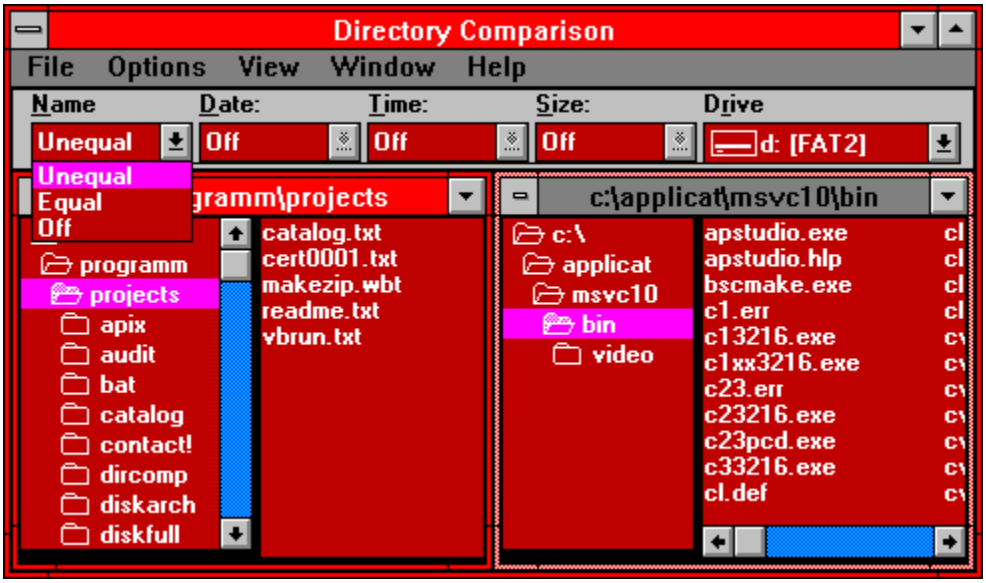
5009-K SHaron Road
Charlotte, NC 28210

Get a JCSM Shareware CD-ROM for half price when you register any product. Jjust mention you saw this offer..

Directory Comparison for Windows

This is a file-management utility that compares the contents of two directories, and shows both the files that are the same, and those that are different. Files can be campared by any combination of name, date, time, and/or size. You can browse, copy, move and delete selected files.

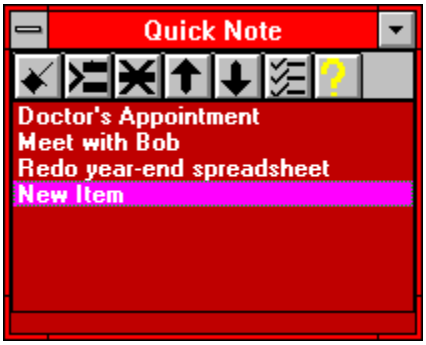


Quick Note for Windows

This is a tool that helps you organize the Sticky Notes and Free-Form Notes that you have cluttering your desk. It relates to your Windows desktop the same way a Sticky Note relaes to your physical desktop; It is;

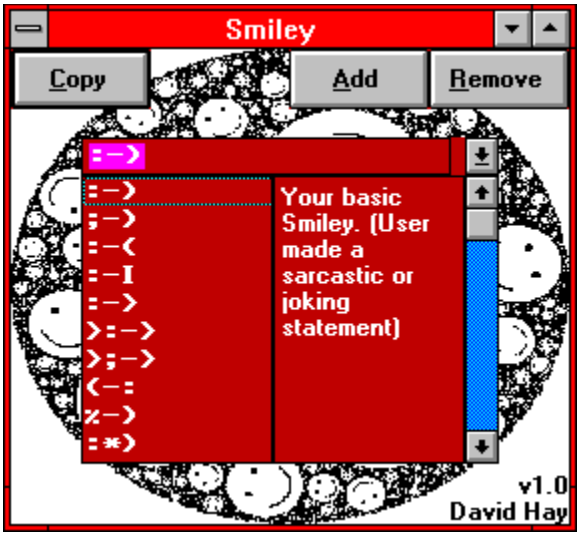
- Quick
- Easy To Use
- As Obtrusive or Unobtrusive as you want it to be

It consists of a List view and an Edit View that let you enter, prioritize and hierarchically structure free-form notes. It has both a menu and a tool bar interface and can be set to temporarily stay on top of your other applications



Smiley for Windows

This is an on-line database containing 100+ variations of the e-mail smiley character strings (:-)) with descriptons. You can copy one into the clipboard and paste it into your e-mail messages.



Zip Directory for Windows

This is one of many shell programs for running command-line based, ZIP file format compression/decompression programs in the windows environment. Each one of these programs has its own advantages and disadvantages, The following were the design objectives for ZIP Directory for Windows;

- Minimal Set-Up
- Uncluttered interface
- File-Manager type interface
- File.Open... directly from archive
