

## How to Cancel an Article

Find the article that you want to cancel and select it. You can only cancel articles that you yourself posted. In addition, if you posted it from a different newsreading program, you cannot cancel it from InterNews.

Choose Cancel Article from the Reading menu. The article will be canceled and a copy of it will appear in a new Compose window. If you want to change the article and re-post it, make the changes and post it as for any other article.

If the article you are canceling is a follow-up, the copy will also be a follow-up. You can change this if you want to repost it as an original article.
