

The Reading Menu

- Sort Newsgroups Alphabetically will alphabetically sort the list of newsgroups in a subscription you have made.
- Sort Newsgroups by Most Unread will sort the list of newsgroups in a subscription according to the number of unread articles in each. The newsgroup with the most unread articles will appear first.
- Sort Newsgroups by Least Unread will sort the list of newsgroups in a subscription according to the number of unread articles in each. The newsgroup with the least unread articles will appear first.
- Refresh All Newsgroups will update any shown newsgroups which have had new articles added since the connection to the news host was made.
- Find... selects the next newsgroup or topic whose name contains a given string.
- Find Again does another Find, using the previous string.
- Add Newsgroup will present a list of all the newsgroups so that you can add one or more to the subscription.
- Remove Newsgroup will delete the selected newsgroup.
- Mark Newsgroup Read marks every article in the newsgroup as read; it's undoable. If you cancelled while getting a newsgroup, only the articles shown will be marked.
- Mark Newsgroup Read Up To Selection marks every article up to the selected topic as read; it's undoable. If you cancelled while getting a newsgroup, only the articles shown will be marked.
- Show All Articles Newsgroup (when just unread ones are shown) will get and display all articles.
- Show Just Unread Articles in this Newsgroup (when all are shown) will get and display just the unread ones.
- Show/Hide Article Header will add/remove the header to/from the text of the article.
- Top of Article will scroll to the top of the first visible article.
- Jump to Next Article will scroll the next article to the top of the pane; if the shift key is down, the next article that is completely out of sight will scroll to the top.
- Convert Article (Rot13) will decode and re-encode articles (usually jokes) which have been rot13-encoded (they look like gibberish).
- Cancel Article... will let you cancel the selected article if you were the one who posted it.
- Set Reading Fonts... will let you specify the font for each of the panes in a Reading window. Fonts are set for the current window layout and remembered independently for each layout.
