…Change the creator type of saved articles

Articles can be saved as text files. You can specify the program that will be launched to view those files. The default is 'MSWD' for Microsoft ® Word.   To change this, edit 'STR ' resource id 2000 in InterNews using ResEdit™ or an equivalent. [Alternately, you can close all windows and choose the Configure for your Site... item from the Edit menu. Be careful about changing any other parameters in this dialog.]
