Color Toolbar for Microsoft Word 5.1a

Replace your "dull" toolbar in Word with this colorized version and brighten up your desktop. Simply rename or remove your existing toolbar, and drag this color version into your Word Commands folder.

This toolbar has been approved for distribution by Microsoft, but is NOT supported by MS or Alki Software. It is freeware, and if you like it, the author requests that you drop him a line (Matt Martinit, 74730.3254@compuserve).

Enjoy!
