

Applications Definitions

Note: *This list is alphabetized to facilitate finding duplicates. If you hold down the <option> key when selecting the item, the listing will be unordered by volume.*

In addition, the list may be restricted to a particular volume(s) by selecting Specify Volumes in the TattleTale menu. If the list contains more than 150-200 applications, the list may run out of memory and you will be informed that the list is incomplete. If this happens to you, a complete listing can be sent to a printed report or text file under the Reports menu.

- *Name = Application name*
 - ◊ *Version = Version number and (32-bit cleanliness) for applications*
 - ◊ *Creator = Finder Creator*
 - ◊ *Supports Local HL Events = Yes/No*
 - ◊ *Supports Remote HL Events = Yes/No*
 - ◊ *Path Name = Location of file*
