

## Internet & Communication

### May 2006

#### **Advanced Link Manager 2.0**

trial

Caphyon, support@caphyon.com, <http://www.caphyon.com>

**Requirements: Mac OS 10.2 or later**

Advanced Link Manager 2.0 helps manage your Web site's incoming links by keeping you informed as to where they come from and what their content is.

#### **browseback 1.0.2**

trial

SmileOnMyMac, info@smileonmymac.com, <http://www.smileonmymac.com>

**Requirements: Mac OS 10.4 or later**

browseback is a Web-history visualization and search tool that stores a PDF of every Web page visited and makes the pages accessible through a unique interface that allows the user to browse thumbnails of the pages. This visual Web history can also be searched by content, making it possible to easily retrieve visited web pages with a few keywords.

#### **Bumper Car 2.0**

demo

Freeverse, info@freeverse.com, <http://www.freeverse.com>

**Requirements: Mac OS 10.3 or later**

BumperCar is the Mac OS X Web browser just for kids. Offering unparalleled content-control and customization features, BumperCar is a powerful Web browser for concerned educators and parents on the Mac.

#### **Camino 1.0**

freeware

Camino Project, <http://www.caminobrowser.org>

**Requirements: Mac OS 10.2 or later**

The Camino Web browser is powerful, secure, and ready to meet the needs of all users while remaining simple and elegant in its design.

#### **Captain FTP 4.4.5**

trial

Xnet Communications GmbH, mac\_support@xdsnet.pl, <http://captainftp.xdsnet.de/cftp>

**Requirements: Mac OS 10.3 or later**

This full-featured FTP and SFTP (security) client was designed specifically for Mac OS X, and features a clean and intuitive Aqua interface, multi-tasking, and compatibility with almost every FTP server available. It also features segment downloading and a copy manager. You can use this full-featured trial version for 14 days before registering.

#### **DashCast**

freeware

Jake Behrens, <http://web.mac.com/doubledangerbat/iWeb/DashCast/Home.html>

**Requirements: Mac OS 10.4 or later**

DashCast allows you to view and track photocasts from your Dashboard. You can watch the updates happen or you can tell DashCast to stay on your favorite picture as the list updates in the tray.

#### **Google Sitemap Automator 1.1**

trial

Rage Software, <http://www.ragesw.com>

**Requirements: Mac OS X or later**

With Google Sitemap Automator, you can automate the process of creating Google Sitemaps by utilizing filters and preset conditions so you don't have to go through thousands of pages yourself. You can then upload your Google Sitemap to your Web server and notify Google so it knows where to find your sitemap file.

### **iTwist n' Go!**

trial

iTwist n' Go!, [contact@itwistngo.com](mailto:contact@itwistngo.com), <http://www.itwistngo.com>

**Requirements: Mac OS 10.4 or later**

Use your iSight Camera to answer and hang-up video and audio calls.

### **OmniWeb 5.1.3**

trial

The Omni Group, [omniweb@omnigroup.com](mailto:omniweb@omnigroup.com), <http://www.omnigroup.com>

**Requirements: Mac OS 10.2.8 or later**

OmniWeb is a fully featured, great-looking native Web browser for Mac OS X. Highly multithreaded and written using Apple's advanced Cocoa framework, OmniWeb also obstructs pop-up ads, searches by keyword through your history, updates your bookmarks, and checks the spelling in your Web forms.

### **pagesender 3.5.4**

trial

SmileOnMyMac, [info@smileonmymac.com](mailto:info@smileonmymac.com), <http://www.smileonmymac.com>

**Requirements: Mac OS 10.1.3 or later**

With pagesender, fax or e-mail anything you can print. Use the built-in pagesender Fax Center to manage and automate your fax activities.

### **PictoGrab 1.1**

trial

Radical Breeze, [webmaster@radicalbreeze.com](mailto:webmaster@radicalbreeze.com), [www.radicalbreeze.com](http://www.radicalbreeze.com)

**Requirements: Mac OS 10.4 or later**

Want to be able to download just the picture files from a Web site or photocast? Just drag the URL for the site to the PictoGrab window and it'll take care of the rest.

### **Sea Monkey 1.0**

freeware

Mozilla Foundation, <http://www.mozilla.org>

**Requirements: Mac OS 10.2 or later**

Sea Monkey is a Web browser, advanced email and newsgroup client, IRC chat client, and HTML editor -- all your Internet needs in one application.

### **Simon 2.1.1**

trial

Dejal Systems, <http://www.dejal.com>

**Requirements: Mac OS 10.3.9 or later**

Web-site monitoring tool that checks sites for changes or failures and notifies you via email, sound, speech, or HTML reports.

### **Snak 5.1**

shareware

Kent Sorensen, kents@snak.com, <http://www.snak.com>

**Requirements: Mac OS 10.2 or later**

Snak lets you participate in discussions in Internet Relay Chat (IRC) channels.

### **SpamSweep v1.2**

shareware

Bains Software, support@bainsware.com, <http://www.bainsware.com>

**Requirements: Mac OS 10.3 or later**

SpamSweep is an advanced bayesian spam filter with a simple, easy-to-understand interface. SpamSweep seamlessly combines many filtering technologies, including domain and relay blacklists, sender whitelisting, and a bayesian filter to automatically delete spam messages before they're downloaded by your email client.

### **wKiosk 4.5**

demo

App4Mac, <http://www.app4mac.com>

**Requirements: Mac OS 10.3 or later**

Web browser for public access terminals or kiosks with or without access to the Internet. wKiosk can individually restrict access to Web sites, the operating system, system settings, and applications.

### **Xyle scope 1.1.6**

trial

Cultured Code, oliver.marquetant@mac.com, <http://www.culturedcode.com>

**Requirements: Mac OS 10.3.9 or later**

Using Xylescope is like surfing with x-ray vision. You will immediately see beneath the surface of the Web pages you are visiting. Experiment by changing CSS values in author style sheets -- no matter if they are on the internet or on your own Mac. Export interesting source code with ease and apply new and consistent formatting to your own CSS files.
