### **Version history**

#### **02/03/2006 version 1.0.9**

Universal binary for Intel-based Macs.

Added the capability to re-create the same directory structure of the source item at the destination

location when the move, copy or burn actions are chosen.

Switched to its own routines for copying items to provide additional benefits including: the possibility

to undo within Tidy Up!, preservation of the directory structure, faster response and more.

Overall improvement and better performance of the move, trash and burn actions.

Fixed all known bugs.

#### **01/03/2006 version 1.0.8**

Fixed bug that sometimes caused strange crashes.

Fixed bug that sometimes caused the incorrect localization of dates.  
Fixed bug that in a certain situation caused the application to not recognize that it was registered.  
Fixed other little bugs.

#### **12/01/2005 version 1.0.7**

Added a contextual menu to the list's items contained in a single location that allows a user to add a selected folder as a location to search.  
Added the ability to select items for inclusion in a scan by selecting them within a rectangle using the Mac OS drag option.  
Added a pulldown menu that allows the user to perform more actions on the list to scan.  
Changed some details of the interface design in the search window.  
Fixed a bug that caused a crash when reading the tags of certain AAC song files.  
Fixed other little bugs.

#### **10/24/2005 version 1.0.6**

Added the capability to search for m4p and m4b audio files tags.  
Added the capability to rename the moved items when an item with same name already exists in the destination.  
Added the "Reveal in Finder" and "Open" menu items in the "File" menu, so now is possible to use the shortcuts.  
Fixed bug that caused crashes when try to burn.  
Fixed bug that caused an unexpected end of the move to trash execution when a permission error was encountered.  
Fixed other little bugs.

#### **09/19/2005 version 1.0.5**

Fixed bug that sometimes caused crashes when certain shared volumes were loaded.  
Fixed bug that sometimes caused crashes when more result windows were opened.  
Fixed bug that caused crashes when the listed items were no longer in the same place, as the specified location.  
Fixed other bugs.

Fixed some cosmetic bugs.

#### **08/16/2005 version 1.0.4**

Added the possibility to export the found list as a plain tabbed text document.

Added the possibility to write a log of the trashed and moved items.

Fixed a bug that sometimes caused crashes when the duration or the bit rate columns were exported.

Fixed other bugs.

#### **07/19/2005 version 1.0.3**

Added an undo function for the move and trash actions.

Added some cosmetic enhancements.

Improved the move algorithm.

Fixed a bug that sometimes didn't stop a search when the stop button was pressed.

Fixed a bug that sometimes caused a strange crash.

Fixed other little bugs.

#### **06/28/2005 version 1.0.2**

Added French localization.

Added some cosmetic enhancements.

Fixed issue that sometimes caused crashes during a search with more than about 500,000 items to compare.

Fixed issue that returned a wrong result when a search with only the same type and the same extension options was chosen.

Fixed issue that sometimes caused crashes when a popup menu was open.

Fixed issue that caused the "Dead Records" window not to recognize that the application was registered.

#### **06/15/2005 version 1.0.1**

Fixed issue that caused a crash when the faster move to trash option was chosen.

Fixed issue that sometimes caused crashes when reading an AAC tag's information.

Fixed issue that sometimes returned a wrong result when search by content was chosen.

Fixed issue that caused the "Continue" button to remain dimmed if the size of the items to trash was zero.

Fixed issue that caused the "Search" window to not display when the

"About" window was closed by  
the red close button.  
Fixed other little issues.

**05/31/2005 version 1.0.0**

First public release.
