Pasted Graphic.tiff "

**Why not consider WebHarmony as a host/design option for your next Web project?**

**WebHarmony offers very reasonable rates and fast turn-around for the Mac community.**

**Visit our home page at: <http://www.webharmony.com>**

---

---

## **1. Introduction**

**Tidy Up!** is the next generation of duplicates finder and disk tidiness utility.

It was designed keeping in consideration the most frequently asked questions of all users regarding the features and the user interface of Doublet Scan (available from 1998 - first quarter of 2005), so my hope is that I've interpreted them well and have created an application that can help most Mac users.

**Tidy Up!** is fast, from 20% to 50% faster than the already fast Doublet Scan. With its multitasking capability, you can do more searches at a time and take advantage of the latest Macintosh computers and operating systems.

With **Tidy Up!** you can search for duplicate files and packages; by the owner application, content, type, creator, extension, date modified, date created, name, label, visibility and more. You can also search by the tag, duration and bit rate of MP3s and AACs audio files, search the content of the iTunes and iPod databases, and synchronize deletions with iTunes.

**Tidy Up!** allows you to search for duplicate folders; by name, date modified, date created, label visibility, empty folders, their contents and more.

**Tidy Up!** comes with a list of tasks with which to do some common searches.

**Tidy Up!** offers a full-size preview of the most commonly used files such as: audio, media, text, pdf, graphics, fonts and more...

One of the most interesting features of **Tidy Up!** is the capability to separate, for quick and easy organization, found items using custom criteria via "Smart Baskets."

Of course **Tidy Up!** allows you to trash, move, burn and export into html files all found items.

**Tidy Up!** is fully customizable and allows you to create your preferred

workspace.

As with many Mac applications the best way to discover all of its features is to use it.

**I Hope You Enjoy Tidy Up!**

## **2. Requirements**

OS X 10.3 or later, full Tiger compatible.

## **3. Registration info**

**Tidy Up!** is sold as **SHAREWARE**:  
**if you use Tidy Up! you should pay the author.**

The cost of a user license is \$30. Purchase it online at: <http://order.kagi.com/?V9B>

As soon as I receive the confirmation of your payment, you will receive the serial number via e-mail with additional information about where you can download the latest release.

## **4. More to come!**

I have more new features that will be added in the next releases.

## **5. Distribution**

**Tidy Up!** is © 2005 by **Giuseppe Giunto**. It can be freely distributed without my previous permission, without any changes and with this "Read Me" by online services, BBS, non-profit user groups, and individuals.

**Tidy Up!** also can be included, without my previous permission, without changes and with this "ReadMe", in all CD-ROM or disk shareware collections and in all CD-ROM or Disk magazines (anyway an e-mail or a notice will be welcome, as well as a copy of the magazine or media :-)).

**Tidy Up!** may not be included in a commercial package without my permission.

The only restriction on an unregistered copy is that a maximum limit of 10 found items may be managed.

**Author's note:**

My software development group is made up by: me

On the other hand, my beta-tester group is made up by: me, Bix and Pat. This means that if you find a bug, both developer and beta-tester groups would greatly appreciate your reporting it!

I wait for your suggestions to improve this program.

And don't forget to register your copy of **Tidy Up!**. Remember that a shareware author should be supported. If you don't pay for shareware software today, you will pay much more tomorrow for exactly the same features (but enclosed in a 'nice' commercial box).

## **6. Disclaimer of Warranty**

This software is provided "as is" and without warranty of any kind, implied or expressed. When using it you assume all responsibility for any damages caused, directly or indirectly, by its use. Also registering this software doesn't give you the right to require extra services (bug fixing, special assistance, and so on): you should pay only because you think the program you're using now is worth the money.

## **7. Acknowledgement**

Thanks to:

Patrick Sheehan,

Giovanni Rava,

and

**all of the people who have registered.**
