ShapeShifter 1.0.1

a haxie by unsanity and geekspiff

What is ShapeShifter?

ShapeShifter is a revolutionary new product that lets you change the overall appearance of your Mac using 'themes'. We're not talking about just desktop backgrounds and icons here, we're talking about everything - the look of windows, menus, buttons, absolutely everything. You don't wear the same clothes everyday, your house doesn't look exactly like your neighbor's - why should the computing interface you use everyday be any different. You personalize your physical workspace to suit your tastes and whims, so why not your Mac?

ShapeShifter makes themes fun, safe and easy

While you may have heard horror stories about themes kludging user's systems, ShapeShifter makes this a thing of the past. Installing themes in MacOS X used to require some dangerous methods (and more than a little bravery on the part of the end user). Not so with ShapeShifter - now changing the overall appearance of your system is every bit as safe as switching desktops or screensavers. ShapeShifter is safe because it never touches the actual files and resources residing deep within your system.

ShapeShifter is also very simple to use - just grab any **guiKit** or **dlta** theme and double-click it ... ShapeShifter will instantly become aware of its presence and pop open the ShapeShifter preference pane. To apply a theme, click the radio button next to the theme and hit the Apply Selected button. That's it!

With ShapeShifter, you can:

- Change the overall appearance of your operating system safely, quickly, and reliably
- Experience things that haven't been possible with Mac themes before
- Quickly preview themes without actually applying them
- Use Jaguar themes in Panther effortlessly
- Install different themes for different users
- Keep your themes wherever you please on your hard drive
- Add and remove themes effortlessly

By using the ShapeShifter **guiKit** format, the theme designer can:

- Do things you never dreamed possible - we're making new discoveries all the time
- Change text colors, funkify metal windows, mask widgets - all things impossible until now
- Ignore problems with Panther themes like shadows and metals - ShapeShifter fixes them!
- Distribute your themes in a non-editable format

All of this functionality is provided in a single, easy-to-use Preference Pane. Best of all, ShapeShifter is priced at only US \$20.

Installing ShapeShifter

To install, double-click the "ShapeShifter Installer" icon and follow the on-screen instructions.

To uninstall, either:

- 1) Double-click the "ShapeShifter Installer" icon and click on the "Uninstall" button (the installer will move all ShapeShifter files to the Trash - it will never actually delete any files on your system).
- 2) Remove the file named "ShapeShifter.prefPane" from the Library/PreferencePanes folder in your home directory and the file "ShapeShifter.ape" from the Library/Application Enhancers folder in your home directory.

Distribution & License Agreement

ShapeShifter is not free. Until you purchase it, it runs in demo mode. The **demo version** has no features removed, but will function **only 15 days after installation**. In order to enable the full version, you will need to purchase ShapeShifter. To do so, go to this URL:

<http://www.unsanity.com/goto/buy-shapeshifter/>

ShapeShifter is priced at \$20 US. Volume discounts, phone and fax ordering are all available in our online store.
