

Thank you for your interest in using this Swizcore Studio Extension Kit. If you find Swizcore Studio GUI's beneficial to your workflow please offer a Paypal contribution to show your support. Contributions can be made by clicking on the Paypal logo at <http://www.swizcore.com/SS/macOSX.php> .

What is included in this Extension Kit?

- *A Safari Skin which helps Safari adopt this Swizcore Studio GUI*
- *Desktop images which accentuate and complete the GUI overhaul*

Installation Instructions:

Extending the GUIPod interface further across your OSX system requires an additional piece of software.

-

The software needed for applying the GUIPod Extension Kit:

To apply the SS Safari Skin(GUIPod):

Safaricon

<http://homepage.mac.com/reinholdpenner/.cv/reinholdpenner/Public/SafarIcon%201.7.tar.gz-link.gz>

Follow the application's instructions for installation then proceed below.

-

Applying the Safari Skin using the suggested software:

Place the Safaricon file(GUIPod) in your ~/Library/Application Support/Safaricon/Themes/ folder. If this "Themes" folder is not there, create it. Launch Safaricon, select GUIPod from the popup button. Click on the "Install" button. The Safaricon Skin has now been successfully installed.

Place the included SS Desktop picture(s) in the Library/Desktop Pictures/ folder.

Now Launch the "Desktop" System Preference and apply the SS desktop picture which goes best with your SS GUI Kit.

Enjoy your fully refined OSX GUI experience.
