Volume Logic iTunes Plug-In

Version 1.0

Volume Logic 1.0 is compatible with Mac OS X 10.2 and 10.3.

After installing, you will have a file in your local iTunes Plug-ins folder called VolumeLogic.bundle:

/Library/iTunes/iTunes Plug-ins/VolumeLogic.bundle

Then run iTunes. In the Window menu there will be a Volume Logic item. Select this item, and the controls will appear in the Volume Logic window. Try the different settings and choose what sounds best to you.
