

BigFoot

Version 2.2

by Ben Haller, Stick Software

Congratulations on your fine taste and discerning judgment in downloading this most excellent Stick Software product. This file is included inside BigFoot itself, so you do not need to keep it. It can be accessed from BigFoot's menu.

BigFoot does not need to be installed anywhere in particular; you can put it wherever you like. However, /Applications and ~/Applications are standard folders for applications in Mac OS X which may be used.

BigFoot is shareware, with a cost of \$10. Please pay for it if you use it. Stick Software's revenue model depends entirely on the integrity of its customers. The more people pay for our products, the more software we'll be able to make in the future! To pay, visit <https://order.kagi.com/?6ZD> or click the payment link in the registration panel. For users who aren't online, Stick Software can handle checks and money orders. They should be in US\$, since the fees to handle foreign currencies are very high. Make them out to Stick Software, and mail them to Stick Software, P.O. Box 610121, Redwood City, CA 94061-0121. If you want to receive Stick Software's newsletter, please write "newsletter: yes" and include your e-mail address on your check. Once you've paid, feel free to tell BigFoot that you are registered, to get rid of the annoying splash panel. Please don't tell BigFoot you're registered unless you have actually paid (again, we rely on your integrity to follow these rules).

For other information, visit <http://www.sticksoftware.com> (the Stick Software home page) or <http://www.sticksoftware.com/software/BigFoot.html> (BigFoot's page).

Please send all questions, comments and bug reports to bhaller@sticksoftware.com.
Thanks!

- Ben Haller
