24U Appearance OSAX 3.1

trial

24U Software, PR@24uSoftware.com, <http://www.24usoftware.com>

Requirements: Mac OS 10.3.9 or later

24U Appearance OSAX is a scripting addition that gives your AppleScript the features you always missed to communicate with users. It allows you to show error messages, generate dialog windows, open floating windows with text, display progress indicators, and send notifications to the user. Still equally simple but much more efficient than the standard "display dialog" command.

Apimac PAD Editor 1.0.1

freeware

Apimac, <http://www.apimac.com>

Requirements: Mac OS X or later

Apimac PAD Editor is a Portable Application Description file editor. PAD files help software authors provide product descriptions and specifications to online sources in a standard way, using a standard data format that allows Webmasters and program librarians to automate program listings. Unlike other PAD editors, Apimac PAD Edit is fully XML compliant and fully PAD-specifications compliant.

REALbasic 2006 Release 1

demo

REAL Software, info@realsoftware.com, <http://www.realsoftware.com>

Requirements: Mac OS 10.2.8 or later

If you're looking to create cool-looking applications but don't want to learn confusing C++ or Java, REALbasic is definitely the way to go. This object-oriented developmental program features a visual interface builder for easy construction of windows and menus, and provides easy-to-understand syntax to get your creations up and running quickly. Create apps for Mac OS, Mac OS X, and Windows (ugh!).
