

WebDesign

Professional Web Authoring Software for the Mac

Rage Software

<http://www.ragesw.com>

Thank You!

Rage Software would like to thank you for using WebDesign and your continued support. Feel free to contact us with any issues that you may have.

NOTE: Please refer to the WebDesign manual, located in the documentation folder, for a more complete overview of WebDesign including FAQs. The WebDesign Manual can be viewed from within WebDesign by going to the Help menu.

Summary

WebDesign Includes built in support for HTML, XHTML 1.0, Cascading Style Sheets, PHP, ASP, JavaScript, XML and VBScript. WebDesign allows HTML tags to be automatically generated using its built in wizards while providing direct manipulation of source code through its powerful text editor.

Edit files locally or remotely using WebDesign's built in FTP Client. Keep your web sites up to date and organized with WebDesign's Site Manager. Use WebDesign Includes to allow customization of an entire site by editing one file.

WebDesign's text editor includes many unique features making web authoring a whole lot easier. Including full customizable syntax coloring with support for HTML, XHTML and PHP color coding. Line numbers, auto indenting, soft wrapping options and more allow web developers to keep there code error free, organized and readable.

When you're finished developing or editing your web page, run it through WebDesign's HTML syntax checker and optimizer to get the best performance out of your HTML code. Preview your web site in any browser, check your spelling then upload it to your FTP server all from within WebDesign.

For more information including a manual and FAQs, refer to the Documentation folder.

Features

- Intelligent syntax coloring for HTML, PHP, CSS and more...
- Live preview of web sites as you build it, including client/server scripts
- File Includes allow editing one file to change entire site
- Site Manager helps keep your web site up to date and organized
- Auto conversion of HTML Entities as you type
- Auto conversion of styled text to HTML, XHTML or CSS
- Drag & Drop tools palette
- Customizable tool bar
- Attribute editor allows easy editing of tag attributes

- Advanced find & replace, including multi-file search and powerful RegEx features
- Condense text into smaller pictures
- Upload and download files or folders right from your FTP server
- Visually create Image Maps, form controls and other HTML elements
- Check and Optimize HTML Syntax
- Download web pages directly off the web
- Create plug-ins to extend WebDesign's functionality

System Requirements

- Mac OS 9.x (9.2 recommended) with Carbon Lib 1.5 or later; Mac OS X 10.2 or higher
- 6 MB of Disk Space

Limitations to the Trial Version

- Limited to 20 launches of full use (can be used past the 20 launches but will receive payment reminders)
- Payment reminder on quit

**If you have already used up your 20 launches on previous versions, you will be able to launch WebDesign 10 more times using the new version*

Installation

Installing WebDesign

Drag the WebDesign folder from the disk image over to your hard drive. For best performance use WebDesign on a volume with write permission. No other installation is necessary.

Installing Plugins

To install plugins just drag and drop the plugin into the plugins folder. If no plugins folder exists just create a new one by pressing COMMAND-N while inside the WebDesign folder and name the new folder 'Plugins'. You may also organize the plugins by placing them within folders inside the plugins folder.

Installing Language Extensions

Installing language extensions is just like installing plugins however you place Language Extensions into the Language Extensions Folder. If no Language Extensions folder exists you may create a new folder and name it 'Language Extensions'. Unlike plugins, Language Extensions can not be inside subfolders. They must be located at the root of the Language Extension's folder.

Purchasing

WebDesign is a shareware product. Please feel free to try WebDesign up to 20 times. If you enjoy using WebDesign and you plan to keep it, you can purchase it using our online store at <http://www.ragesw.com/onlinestore.php> or the integrated purchasing wizard within WebDesign (Under Application menu in OS X). Our secure online store accepts payments in many currencies and we also accept PayPal, money orders and checks.

A single user license for WebDesign can be purchased for **\$29.95 US**. By purchasing WebDesign you allow your self to take full advantage of all its advanced features and you get rid of any limitation in the demo mode. Visit our online store for details on our competitive upgrade offer for users of third party HTML editors.

You can purchase WebDesign through Rage Software's online store at <http://www.ragesw.com/onlinestore.php>. Purchasing online is **fast, easy and secure**. You do not need to worry about credit card fraud or any other security issues. You must visit the online store to print out the appropriate forms for money or check orders.

Upgrade from WebDesign 1.x to version 2.x for just **\$20.95 US**. Further details can be found in the user manual located in the documentation folder or from the Rage Software online at store at <http://www.ragesw.com/onlinestore.php>.

Entering Your Serial Number

After placing your order your registration number will be included in the 'Order Summary' section of the payment confirmation email. Simply open the about window (Under the apple menu in OS 9 or the Application menu in OS X) and press the 'Register Button'. Enter your name and email address used when purchasing into the first two fields, then enter your registration number into the last field.

Upgrading from version 1.x

For information on entering your upgrade serial number as well as further details on entering your registration details, refer to the user manual, FAQs or the trouble shooting information within the register dialog.
