Chapter 1

function

1.1 CYCAS DEMO - Help - Functionlists

Brief overview of the functions:

All the function lists are grouped together in subordination to the topic of each function. For example, note that the function lists

"Project" and
"Symbol"

contain various data functions.

The function lists

"Line",
"Circle",
"Dim",
"Text",
"3D" and
"Unit"

are subordinated to the different types of drawing elements.

The function list

"Edit"

contains the functions which can be used globally for all elements.
