FEATURES

22 HACKING THE WINDOWS REGISTRY by Keith Pleas

You don't need a bullwhip or a machete to hack through the Windows registration database. A copy of RegEdit will do, along with the author's expert guidance.

44 KEEP IN SYNC WITH JET REPLICATION by Paul Litwin

Jet 3.0's database synchronization and replication support increases your data-sharing options, and eases the daunting task of implementing these crucial features.

54 A WALKING TOUR OF RDO by William R. Vaughn

A pioneering developer suffers the slings and arrows of implementing a client/server system using RDO. It turns out he made the right choice for his system's size and design.

62 THINK BEFORE YOU PORT by Steve Jackson

We think, therefore we allow our 32-bit applications to call 16-bit third-party DLLs. We save time and money. We are smart.

68 READING THE MAIL by Peter Vogel

MAPI gives you the benefits of workflow automation features such as built-in fault tolerance and administration capabilities—for free! Don't tell Microsoft.

COLUMNS

80 Programming with Class
by Deborah Kurata
