CLASSY COLLECTION

ClassAction, a collection of Windows API functions, enables VB programmers to utilize the Windows API in the form of easy-to-use VB objects. With the same look and feel of VB custom objects, VB developers can gain enhanced performance and more robust applications using the API properties without having to learn a new methodology. Its open standard enables VB programmers to adopt an object library approach to extend VB. $139. Available now.

Crescent Division of Progress Software Corp. Phone: 617-280-3000 or 800-35-BASIC. Fax: 617-280-4025. CompuServe/Internet/World Wide Web: http://www.progress.com/crescent; crescent@progress.com.

RADBENCH

RADBench is a developer productivity tool to help build business applications more easily. It snaps directly into the VB IDE, and includes bookmarks in form or code windows, a code manager for API definitions, Message Box and Common Dialog Designers, one-button commenting of entire blocks of code, quick insertion of pre-defined subroutine headers and revision marks, timed automatic saving of the current project when changes have been made, and a set of control alignment tools including container-relative positioning. $119. Available now.

AUTOMATIC DATA ENTRY

DataView/OCX is a 16/32-bit OLE control that provides an automatic data-entry view of your data. Place the control on your form and bind it to a data source; it automatically positions and sizes each field for you. Each field is displayed as a text box, combo box, check box, and so on, depending on its data type. DataView/OCX also allows the end user to customize the view at run time. The package includes the DataNavigator/OCX, an enhanced user-interface to the standard data control. $179, royalty free. Available now.

GreenTree Technologies Inc. Phone: 800-257-7708. Fax: 516-271-8067. CompuServe/Internet/World Wide Web: GO GREENTREE or 76711,2537.

WINAPI OBLETS

Sheridan WinAPI Oblets is a set of programmable application objects that encapsulate the functionality of the most commonly used Windows API functions to provide you with object-based access to Windows system services. Oblets are a new class of nonvisual components that use OLE Automation to deliver high-performance objects that you can knit together using any language capable of calling OLE Automation servers, such as Visual Basic and Microsoft Access 95. $139. Also included in Sheridan's ClassAssist for Visual Basic 4.0. Available now. Source code not available.

Sheridan Software Systems Inc. Phone: 516-753-0985 or 800-VBDIRECT. Fax: 516-753-3661. World Wide Web: http://www.shersoft.com.

CUSTOMIZABLE CAD PROGRAM

DesignCAD 2D for Windows 95 is an architectural drafting and mechanical design program that you can customize using Visual Basic. You can customize toolboxes and symbol menus to suit specific needs. Because DesignCAD supports OLE, you can paste or embed designs in multimedia applications, word processors, and desktop publishing programs. It also features a Microsoft Mail interface. $349.95. Available now.

ViaGrafix Corp. (Software Division). Phone: 918-825-4844 or 800-233-3223. Fax: 918-825-6359.

VISUAL DEVELOPERS SUITE DEAL

This suite of component software includes First Impression, Formula One, VisualSpeller, and VisualWriter. Includes online documentation, example code, and demonstration applications. The latest version of the suite features OCXs. With the new Suite Subscription Program, you can receive quarterly updates to the Visual Developers Suite Deal for an annual subscription fee. $299. Call for pricing of Suite Subscription Plan. Available now. Source code available at extra cost.

Visual Components Inc. Phone: 913-599-6500 or 800-884-8665. Fax: 913-599-6597. CompuServe/Internet/World Wide Web: 74774,443; BBS: 913-599-6713; sales@visualcomp.com; http://www.visualcomp.com.

TRAINING/ CONFERENCES

VISUAL BASIC INSIDERS' TECHNICAL SUMMIT '96

At the Visual Basic Insiders' Technical Summit (VBITS), you'll learn about OLE Automation and OLE controls; DBMS development; accessing the Windows API; tips, tricks, and techniques for use with both Visual Basic for Windows and Visual Basic for Applications (VBA), user interface design; and client and host development, multiple-document interfaces, graphics, animation, and bug fixes. The sessions are aimed at the professional developer. The conference locations and dates are: Japan (May 15-16); New York, New York (June 24-26); Orlando, Florida (September 25-27). VBITS is sponsored by FTP and Microsoft Corp. Call for more information and an advance registration kit.

ACCESS ENTERPRISE DATA

Arranger lets you access enterprise data from an OLE-enabled application written in Visual Basic, while maintaining business rules and data integrity. You can enroll business objects created by TI's Composer into the Arranger Catalog to make them available to VB and Excel. Version 1.1 features enhanced support for Windows 95 by providing a 32-bit in-process server, and enhanced integration assistants to utilize the 32-bit OLE capabilities of Visual Basic 4.0 and Excel 7. Call for pricing. Available now.
