

QuickForm 2.0

Written by Martin Massé 75034,1755

Welcome to QuickForm 2.0, the quickest and easiest way to create forms for Microsoft® Visual Basic 3.0™. QuickForm allow you to create forms and code from Access Tables or Queries (Version 1.0, 1.1, 2.0). using a template file.

QuickForm makes you more productive by providing tools to help you generate forms, controls, and the code to make them work. You build your template file using VisualBasic. You set properties on objects you put on the form or the form itself. Then you make this form work by creating the code in the same template file using VisualBasic or a text editor. Using QuickForm, you can create powerful, full-featured forms, using your code architecture and custom control you own.
