

***** WELCOME TO MSGBXED *****

Here is the easiest way to design message boxes for use in Visual Basic:

MSGBXED - The Visual Basic Message Box Editor

Introduction:

The Message Box Editor is a simple-to-use program that allows you to create the message box you wish to present to the user of your Visual Basic application. You can select all of the parameters that comprise the message box to include such items as its icon, title, message, and modal properties. Once you have entered/selected all of the parameters, you can view the message box as the operator of your software would. Once satisfied, the Message Box Editor will paste the Visual Basic source code necessary to define the message box into the Windows' clipboard. You are permitted to determine if you wish the resulting source code to support a function or a subroutine message box initialization.

Features designed into the Message Box Editor include the ability to save the last configured message box and the ability to handle multiple lines and tabs in your message.

System requirements:

Windows 3.1 or above. Additionally, if downloading MSGBXED from a bulletin board service, then you will need VBRUN300.DLL as this file is not included in the ZIP file for file size considerations.

Registration:

By registering MSGBXED, you are entitled to the latest version. There are two options available to register MSGBXED and are as follows:

1) Order By Mail

MSGBXED may be registered by sending a check or money order to the author:

James Durocher
5140 Farm Ridge Place
Colorado Springs, CO 80917

The price for a single user version of the MSGBXED is \$12.95. Discounts are available for orders of five copies or more. The price for five or more copies is \$10.00. Additional costs include shipping of \$1.95.

CIS: 76061,3515
AOL: JDurocher

2) Order Through CompuServe

You can purchase the MSGBXED through the shareware registration forum on CompuServe (SWREG) for \$12.95 and \$10.00 for five or more copies.
