About Installation Program

The general Installation program WinSetup 2.0 is developed for MS Windows 3.1

WinSetup 2.0 is an attempt to bring a more professional and stable Installation Package to the general public. WinSetup is a well-designed, easy-to-use application installation utility that rivals or surpasses other commercial installation programs. The intention is to make it easy for the user to include a powerful installation program for the Windows environment. WinSetup can be used to install any product to the Windows environment, including other software, presentations, price lists, etc. All you need, besides WinSetup, is an ASCII / ANSI editor.
