VB PLUS

The ultimate environment enhancer for Visual Basic!

VB Plus enhances the capabilities of the Visual Basic programming environment. VBP will make development of any project in Visual Basic much faster. Using VB Plus lets you concentrate less on the VB environment and more on your code!

This shareware version provided for evaluation purposes ONLY! You may use this program for 30 days to try it out before purchasing the registered version. I'm sure you'll find VBP a useful addition to your VB programming environment!

Introduction

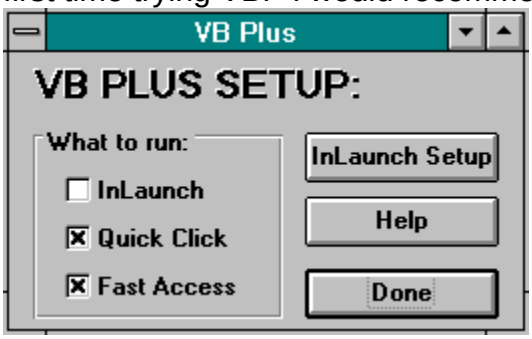
Next >>

Before you run the quick tour I recommend you read the section installation.

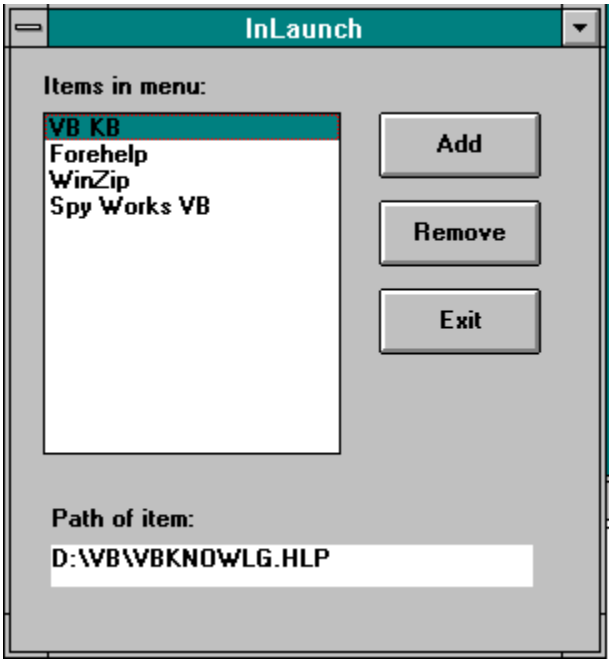
VBP consists of three components. Quick Click enables you to drag and drop text in the VB Code window. InLaunch adds a customizable launch menu to the VB environment. Fast Access enables you to add, delete or save files from inside the Project Window. This quick tour will show you how to setup VBP and how to use its three components.

Setup

To run the setup program for VB Plus open the file manager and click the file vbpsetup.exe in you VBP directory(where you put all your VBP files!). Doing this should bring up the screen shown below. On this screen you may select which of the VBP components you would like to use the next time you run Visual Basic (If this is your first time trying VBP I would recommend selecting them all).



Clicking the InLaunch setup button will bring up the screen below.
To add an item to the InLaunch menu: First, select an item in the "items in menu" list. The new item will be added after the selected item. Next, click the "Add" button. You will then be prompted to enter a filename and a title for the new item.
To remove an item from the IL menu simply select the entry you would like to remove from the "items in menu" list and click the "Remove" button.



Quick Click

The Quick Click utility is used to rapidly move a piece of code from one place in the VB code window to another. To use Quick Click, first select the piece of code you would like to move. Then click the right mouse button once. Next, move the mouse to where you would like to insert the text and then click the left mouse button (to move the mouse pointer to the new location). Then click again with the right mouse button and the text will be inserted. Repeat this process for the next piece of code.

InLaunch

InLaunch is a utility that adds a launch menu to the VB environment. Pulling down the menu and selecting any item on it will launch that program. To add a new program to the menu see the section Setup.

Fast Access

Fast Access is a utility that enables you to add, delete or save files from within the project window. FA will add a menu-like toolbar to the project window. Clicking on an item on this toolbar will preform the action of that item.

Register

<<Previous

VB Plus is shareware. You may use only use it for the trial period of 30 days. After that period of time you must register the program. There are two ways to register:
Via Compuserve
Via US Mail

This is the end of the quick tour. To exit the quick tour close this window.

Order form

Select Print Topic from the File menu to print this form

VB PLUS ORDER FORM

Please enclose a check or money order payable to Daniel Gottlieb for the amount of $18.00 ($18.00 for the program and $2.00 shipping).

Mail this form to:

Daniel Gottlieb
1262 Bramble Rd.
Atlanta, Ga. 30329

InLaunch

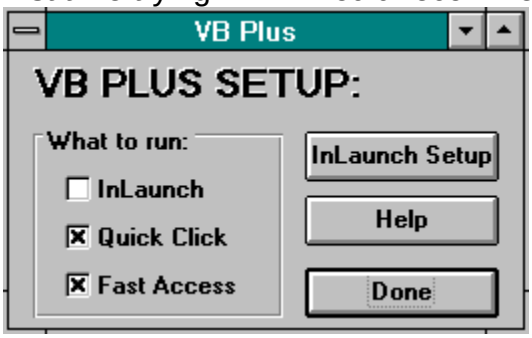
InLaunch is a utility that adds a launch menu to the VB environment. Pulling down the menu and selecting any item on it will launch that program. To add a new program to the menu see the section Setup.

Quick Click

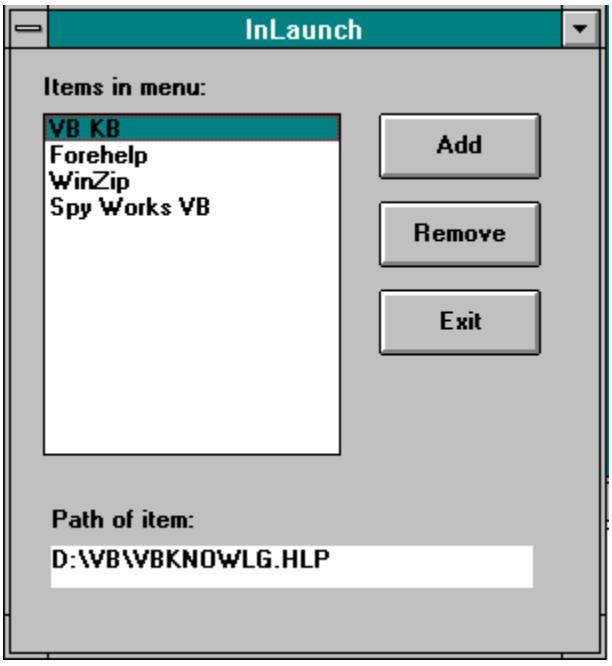
The Quick Click utility is used to rapidly move a piece of code from one place in the VB code window to another. To use Quick Click, first select the piece of code you would like to move. Then click the right mouse button once. Next, move the mouse to where you would like to insert the text and then click the left mouse button (to move the mouse pointer to the new location). Then click again with the right mouse button and the text will be inserted. Repeat this process for the next piece of code.

Setup

To run the setup program for VB Plus open the file manager and click the file vbpsetup.exe in you VBP directory(where you put all your VBP files!). Doing this should bring up the screen shown below. On this screen you may select which of the VBP components you would like to use the next time you run Visual Basic (If this is your first time trying VBP I would recommend selecting them all).



Clicking the InLaunch setup button will bring up the screen below.
To add an item to the InLaunch menu: First, select an item in the "items in menu" list. The new item will be added after the selected item. Next, click the "Add" button. You will then be prompted to enter a filename and a title for the new item.
To remove an item from the IL menu simply select the entry you would like to remove from the "items in menu" list and click the "Remove" button.



Check the parts of VBP you would like to use the next time you run VBP.

Clicking this button will bring up the screen below, where you may select what programs you want to appear on the launch menu.

Running VBP

To run VBP open the file manager and double click the file VBPLUS.exe from your VB Plus directory(the directory where you put your VBP files). This will run both VB and VBP. If VB is already running you can still start VBP.

Starting VBP

To run VBP open the file manager and double click the file VB PLUS.exe from your VB Plus directory(the directory where you put your VBP files). This will run both VB and VBP. If VB is already running you can still start VBP.

Register on-line!

If you have a CompuServe account you can register VB Plus on line using the Shareware Registration forum (SWREG forum). Type GO SWREG to access this forum and select "Register Shareware." A number of search criteria will be presented; you want to search by Registration ID.

NOTE: The REGISTRATION ID of VB PLUS is 3843

You can use this number to find VBP. Once the file is found, you are asked: "Would You Like to Register? (Y/N)."
Enter "Y" at the prompt to register. When you enter "Y" to register, you will be prompted to enter your full name, company name (optional), your complete address, your phone number (optional) and the total number of copies of the program that you wish to register. When you finish entering this information, you can VIEW, CHANGE, SEND or CANCEL it. When you SEND your registration, your CompuServe account will be billed for the amount required to pay for the software.Once DG Software receives notification of your registration a registered version of VBP will be sent to you in the mail.
